Shown with 3.0mm stone

STUD INSTRUCTIONS:

- Unscrew jewelry end from post over a soft cloth or tissue to ensure parts don't get lost.
- Insert post from backside of piercing until it's visible from the front side.
- Twist jewelry end to secure. When looking at the jewelry front end, it's "lefty loosey, righty tighty"! Twist until just tightened; do not overtighten.

Make sure the jewelry measurements are accurate by holding one of the cards below to the width of this box.
