PRECISION SQUARED CORNERS
ensure complete coverage in corners

SPREADS GROUT IN TIGHT AREAS

This installer grade QEP® 6" x 2" Comfort Grip Margin Float is used for tile grouting in hard-to-reach areas, including back splash and under counters. It has a comfortable non-slip handle and a steel backing plate that resists bending. The padding is made of gum rubber, which is ideal for easily pushing grout into grout joints, due to its strength and flexibility.
