# ABSTRACT ALIAS

*Rethink and rewire through a jumbled and untrodden path, as abstracts open gates to groundbreaking and genius perspectives*

Terra Incognita is a collection of products that is re-thinking industrial clay used for styling prototype car surfaces. The concept is developed and produced by Johanna Seelemann in collaboration with car designer Daniel Rauch. Focused on adaptability and controlling consumption, this proposes reshaping a product's body using material that can be warmed, formed and re-adapted, instead of replacing it. Mumbai-based Chanakya ateliers and Chanakya School of Craft in tandem with Dior women's collections bring forth monumental textile artworks by award-winning Indian Artists Madhvi and Manu Parekh. The works depict traditional Indian motifs and spiritual abstractions that present juxtaposing entities. Website: [www.chanakya.in](http://www.chanakya.in); [www.dior.com](http://www.dior.com)

## ABSTRACT ALIAS

*Unshackled from boundaries and inhibitions, abstracts are things that bring imagination to life and life to design*
