Do you remember the joy of carving out your own nook to get away in when you were a child? Building your own fort in which to relax? Wouldn't it be great to have the ultimate cozy space? With zPods®, we make that dream possible. Our beds come in two models.

ZPODS® GEN 2 SINGLE

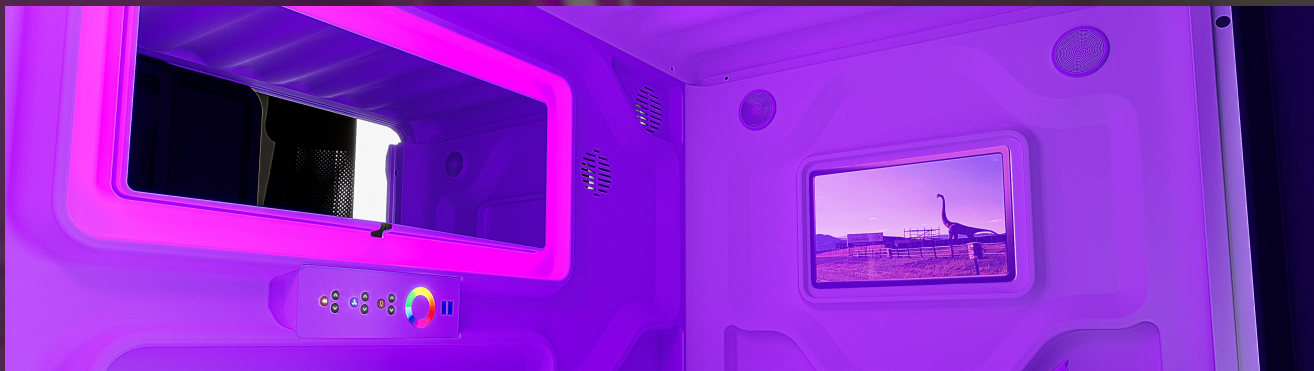

The zPods® Single is ideal for restless and energetic children who need a place to get away.

ZPODS® GEN 2 DOUBLE

The zPods® Double is ideal for two children who share the same room and keep each other up past bedtime.

FEATURES

Some sleepers are highly anxious, which can be hard on both them and you. Our zPods® beds give these children a sense of control. Check out our control panel below.

Our zPods® beds come with the following features:

- **SAFE SPACE:** A sturdy structure and durable walls to keep kids completely safe from monsters and bad dreams!
- **CONTROL PANEL:** Control of lighting, sound, and fans for a tailor-made sleep environment! (COMING SOON: BLE 5.0 Bluetooth®-connected control panel that can be controlled from inside or outside the bed using the zPods app on smart phone or tablet, with the option for parents to selectively lock and unlock the bed's features, depending on the maturity of their child)
- **LIGHT:** Multi-mood LED lighting to set the environment according to mood and sleep cycle, including the option to shut out light for sleep
- **TEMPERATURE:** Fan control that keeps air circulating and fresh (COMING SOON: Scents and filters!)
- **SOUND:** Bluetooth® speakers that connect with your smart device (e.g., tablet, phone, etc.) to allow you to pipe in white noise, calming music, or whatever helps your child relax
- **COMFORT:** An interior that is 6'6" from end to end—enough space to fit a memory foam twin mattress (**sold separately**) (max size: 43" x 78")
- **ENERGY:** USB plug-ins to charge cell phones or other electronic devices
- **TECH:** Internet TV on a high-definition screen (**sold separately**)
- **EASE:** Sliding doors that are easy to install and remove, making cleaning and making the bed easy (COMING SOON: door designs that are customizable to match room decor)
- **CONVENIENCE:** Shipped flat and requiring 30–45 minutes of intuitive assembly for two people

AUTISM & SENSORY PROCESSING DISORDERS

SENSORY PROCESSING DISORDERS

Up to 90% of children with autism have a sensory processing disorder, which means that they are very sensitive to their surroundings. Many of these children find cozy nooks to hide out in when they become overly distraught. In fact, architects of autism-friendly environments often incorporate a nook into their design so that these children have an “escape space” in which to decompress. LED lighting is particularly soothing for them. Drawing on all these calming elements, zPods® capsule beds are a terrific place for these children to find peace.

SLEEP

Though the relationship with sensory processing disorder is not fully understood, it makes sense that up to 80% of children with autism also have a chronic sleep disorder. Factors that help them to sleep better include lighting, white noise, and a removal of distractions (e.g., pictures, sound, or a messy or busy room) from their sleep environment. Many children with autism feel exposed sleeping in the open and seek out a closet, corner, or space under the bed to sleep in. zPods® give these children a place of their own without distractions where they can feel safe while they sleep.

A WONDERFUL PLACE FOR ALL KIDS

It's not just children with autism who enjoy a secure and enclosed environment. Children of all stripes love a good nook to relax in. With the right kind of nook, you can make their bedroom more calming, more restful, and more fun. We want to bring that nook to the children you care so much for and invite you to adopt our zPods® solution.
