

BULL PUPPY

Based on the U.S. Air Force's Bull Pup missile, this kit is visually exciting on the ground as well as in flight! It's perfect for beginners and experienced rocketeers alike. Don't let the name fool you, this *puppy* is equipped with a 38mm motor mount and can be flown with 29mm motors using the optional motor adapter ADPTR-38/29. 39" tall and weighs approximately 32 oz. Can be flown on G through I motors.

Features Include:

- Scale-like kit
- Pre-slotted Quantum Tube airframe and plastic boattail
- G-10 fiberglass fins
- Piston ejection system
- Multi-panel nylon parachute
- Plastic nosecone
- Thin-wall brass launch lug
- Detailed decal sheet
- Explicit instruction

Dia.: 3.0" Height: 39" Weight: 32 oz. MMT: 38mm Chute size: 36" Launch lug: 3/8"

Shaded cell means this motor/rocket combination requires absolutely top-notch construction to fly successfully.

Other motors can also be used but some may require modifications to the kit.

Always refer to the Motor Recommendations Chart at www.publicmissiles.com for the latest information.
