

Each light bar includes **3** integrated snap-on polycarbonate lens covers, **specifically designed for added protection** for your WURTON LED Light Bars.

WURTON, the premier manufacturer of high-performance LED lighting products, is the **only** Light Bar manufacturer that provides you with the **secondary lens cover advantage**.

INSTALLATION & REMOVAL INSTRUCTIONS:

1. Start on one side of the light bar and carefully align the cover with the primary lens. Apply a fair amount of pressure as you make your way down to the other end of the light bar. You should hear it snap into place when installed correctly.
2. To remove the lens cover, simply grip the lip of the lens cover from the bottom end, and pull up.

FOR OFF ROAD USE ONLY.

FOR VIDEO

3 INTEGRATED SNAP-ON
SECONDARY LENS COVERS INCLUDED

DESCRIPTION:

- 1** The clear secondary cover protects your primary lens from rocks, sand, and other debris.
- 2** The amber secondary cover provides improved visibility in dust, fog, and snow.
- 3** The black secondary cover provides additional protection, but also meets most states' D.O.T. regulations that require auxiliary lights to be covered while on public streets.*

*Please check your local off road lighting laws/regulations for further information.
