

# SCOUT™

## HIGH POWER LED CUBE LIGHT

### INSTALLATION INSTRUCTIONS:

1. Attach Red Terminal Eyelet to Battery (+) or 12V Source.  
Secure Black Terminal Eyelet to Battery (-) or suitable ground.
2. Route Wire Harness to desired Switch mounting location.  
*Be careful to properly route and secure all wiring to keep from causing damage to wiring and/or vehicle.*
3. Attach Black Wire to Gold Prong on Switch.  
Attach Red Wires to Silver Prongs on Switch.  
*If Switch remains lit while in the OFF position, swap red wires to ensure proper function.*
4. Connect Wire from Switch to Light.

### INSTALLATION TIPS:

1. If not using wiring harness provided, use the correct gauge of wire to keep amp draw to a minimum.  
*(Visit [wurton.com](http://wurton.com) for more information)*
2. Make sure to use the appropriate fuse when wiring the system.  
*(Visit [wurton.com](http://wurton.com) for more information)*
