Saizen 5mg/ml or 8mg/24iu kit. Add a review. Saizen [somatotropin (rDNA origin) for injection] is a human growth hormone produced by recombinant DNA technology. Saizen has 191 amino acid residues and a molecular weight of 22,125 daltons. Its amino acid sequence and structure are identical to the dominant form of human pituitary growth hormone. MANUFACTURED BY : Merck-Serono
PACKAGE : 8 mg (24iu) Qualitative and quantitative composition Each vial of Saizen 8 mg click.easy contains 8 mg somatotropin* (recombinant human growth hormone). *produced by recombinant DNA technology in mammalian cells Reconstitution with the contents of the bacteriostatic solvent cartridge gives a concentration of 5.83 mg/ml.

Human Growth Hormone's primary effects on growth functions of the body are in three primary areas: bone growth, skeletal muscle growth, growth of internal organs, and the healing/growth/repair of connective tissue such as tendons, ligaments, and joints. In terms of its effects on metabolism, it supports the efficient functions of protein.
