

Changing Currency and Language

StitchDelight.net

On a Mobile Device

Language and Currency should automatically update based on where you're located in the world.

However, this might not work

If you're using a VPN (Virtual Private Network) since a VPN generally makes it look like you're in another country.

So here's a quick way to adjust the currency and language to your preference.

Click on the selector located on the bottom right hand corner of your screen.

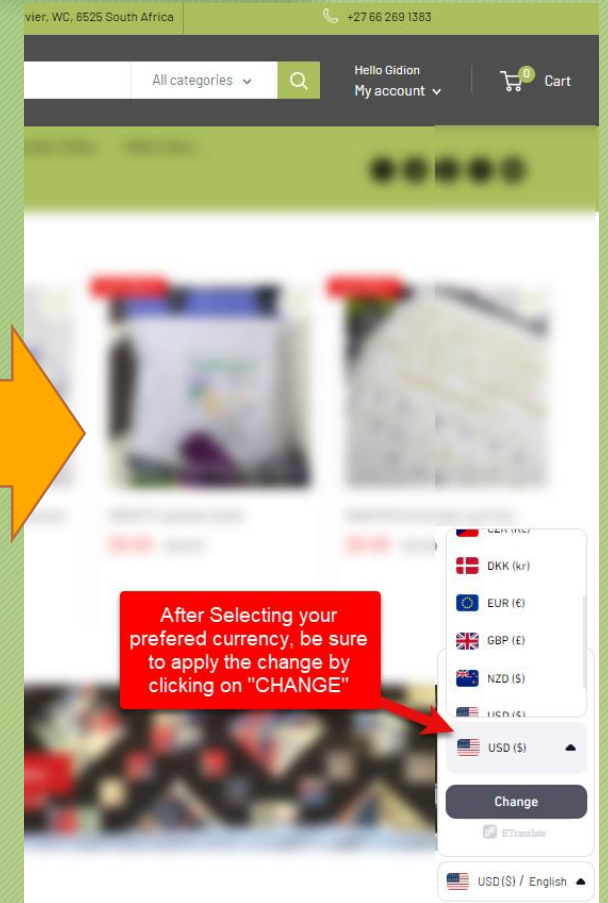

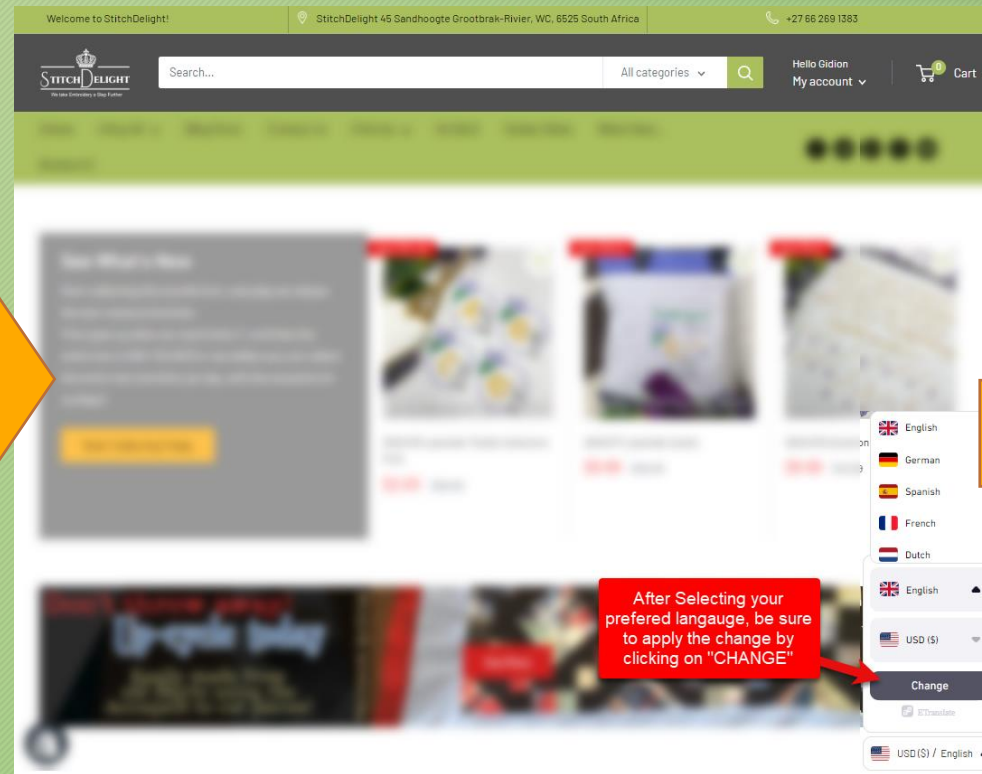

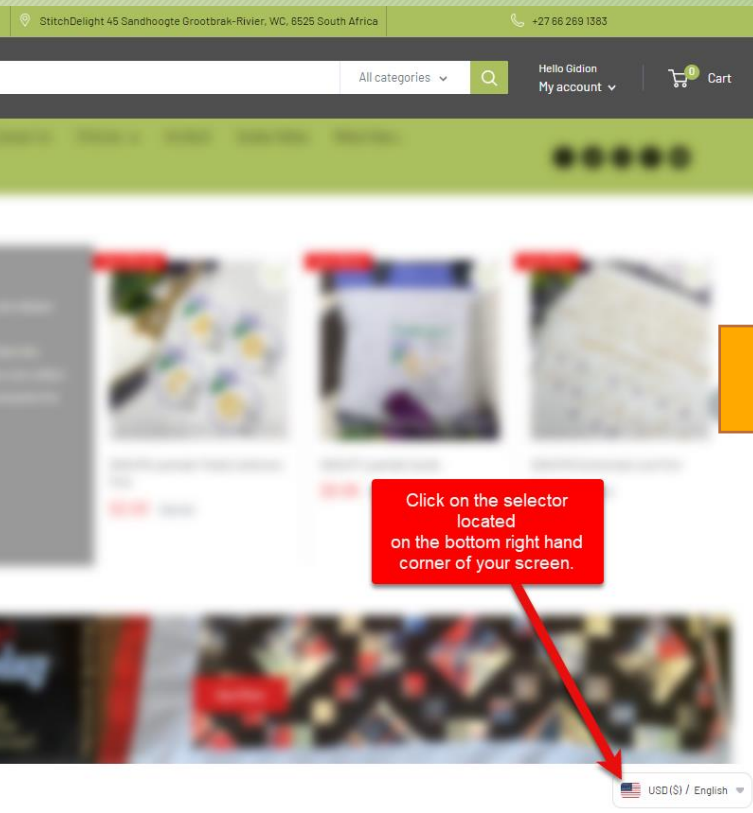

After Selecting your preferred language, be sure to apply the change by clicking on "CHANGE"

After Selecting your preferred currency, be sure to apply the change by clicking on "CHANGE"

The screenshots show the following steps:

- Initial state: USD (\$) / English
- Language selection menu: English, German, Spanish, French, Dutch, English (selected), USD (\$)
- Currency selection menu: USD (\$), EUR (€), DKK (kr), EUR (€), GBP (£), NZD (\$), USD (\$), USD (\$)

On your PC

Missing Something?

Some browsers don't play nice with certain popups and features on websites. It's for this reason that we recommend using one of these popular browsers:

- Google Chrome (A good choice for compatibility across most websites)
- Mozilla Firefox

Your language/currency not listed? Let us know and we'll try our best to add it.
