TIMBERWOLF

FIREWOOD PROCESSING EQUIPMENT

607-307-4029

www.TimberwolfEquip.com

- ▲ Boost splitting quality and quantity with the AutoFine wood cleaner, designed to eliminate unwanted debris and output clean firewood
- ▲ Made to couple with other Timberwolf products and can be connected to any processor on the market via its built-in auxiliary port
- ▲ Firewood businesses can alter the quality of their wood and separate themselves from the competition with the AutoFine

FEATURES

Hex Discs

- Made from 3/19" steel
- Eight rows of discs, each spinning around a rod, make up the screen deck
- Makes logs spin and shake, causing fines and kindling to detach from the split wood

Hopper

- Acts as a funnel for raw materials being loaded onto the screen deck
- Quick bolt-on set up, so removal is as easy as installation

Power Pack

- Essential for large firewood processing operations
- Can be moved independently, allowing for placement safe distance away from work area
- Exceptionally quiet and fuel efficient

Chute

- Quick bolt-on chain bar and separate chute
- Slows the descent of traveling firewood
- Allows for smooth transition to conveyor, pickup, or other next step in production

The AutoFine's Hopper, Power Pack, and Chute are available as Add-On Options.
