[www.TimberwolfEquip.com](http://www.TimberwolfEquip.com)

- ▲ The ergonomic design allows operators to split for hours on end without being hunched over
- ▲ Essential for the self-employed operator looking to split more without the extra labor
- ▲ Built with a valve cover and large hydraulic tank for maximum durability
- ▲ Capable of outputting \$450 worth of firewood in just one hour

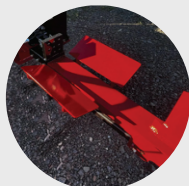

## FEATURES

### Power

- Choose 4" or 5" bore
- Hydraulic pump flow of 22 GPM
- Valves and hoses protected by cover to increase durability against the elements

### Splitting Chamber

- Self-centering splitting chamber ensures that logs of any size are perfectly positioned prior to being split
- Creates a safer and more efficient user experience

### Hydraulic System

- Wedge Lift with 8" of vertical range
- Log Lift capable of lifting up to 500 lbs
- 25 gallon tank to maintain cool and filtered fluid

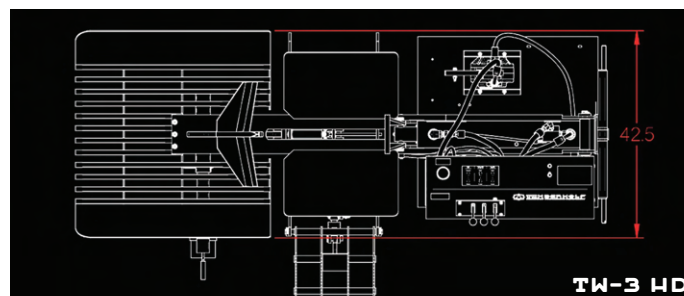

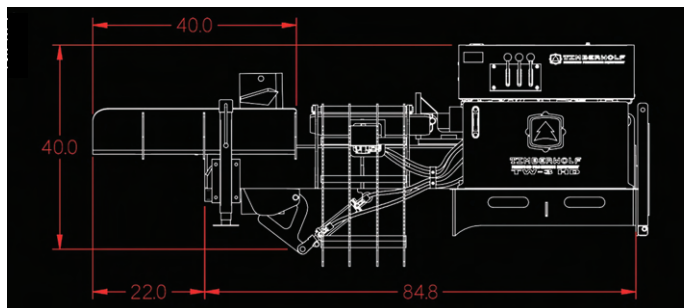

### Table Grate

- 32" long, constructed from heavy gauge pipe and High Steel plate steel
- Cleans out debris from split firewood, and catches logs for resplitting

All HD Series Log Splitters come standard with a 4-Way Wedge, Table Grate, and Hydraulic Log & Wedge Lift.
