

TW-10

LOG SPLITTER

TIMBERWOLF

FIREWOOD PROCESSING EQUIPMENT

607-307-4029

www.TimberwolfEquip.com

- ▲ Designed to split monster logs into manageable blocks for processing
- ▲ Capable of splitting logs long as 12' and wide as 60" in diameter
- ▲ Remote control operated for operator safety and ease
- ▲ Essential for any large lumber operation
- ▲ Turn you waste into profit with this diesel beast

FEATURES

Monster Frame

- 3" thick steel frame ensures years of reliable use
- 30' long, capable of handling any log it is faced with
- Dual 7,000 lb axles

Incredible Power

- 74 HP diesel engine
- Hydraulic pump flow of 33 GPM
- Capable of cycling the cylinder every 54 seconds

4-Way Wedge

- Colossal 4-Way Wedge comes standard on the TW-10
- Together with the massive splitting chamber, this wedge is able to split even the gnarliest of logs

8" Cylinder

- Huge cylinder provides 150,000 pounds of splitting force with an 8' stroke
- Large push block eliminates need for operator interference, providing a safe and efficient user experience
