

Press release

The German Hockey Federation and MITOcare go into the 2024 Olympic year together

Munich, January 24, 2023

MITOcare remains an official partner of the German Hockey Federation (DHB) and continues to support the men's, women's and youth national teams with high-quality, natural nutritional supplements. MITOcare has been a trusted supporter of the players since 2022 and works closely with the DHB's medical department.

"We are delighted to continue our cooperation with MITOcare and want to work together to create the best possible conditions for the upcoming competitions, especially in Paris in 2024" says Raphael Thelen, Managing Director of the DHB.

Robert Gorzolla, DHB association doctor, is also looking forward to the joint future: "In working with MITOcare, we have recognized that high-quality supplementation with micronutrients provides lasting support for the players. This was particularly evident in the outstanding success of the men's and men's U21 youth teams at their World Championships in 2023, where we were able to win the title in each case. And we now want to continue this together."

The MITOcare product range offers a broad spectrum of nutritional supplements and functional foods - not just for athletes, but for everyone.

The high-quality products are tailored to the needs of athletes, especially in the sports sector. The aim is to support energy metabolism, resilience and regeneration. Particular emphasis is placed on the excellence and reliability of the products, which are subject to systematic testing to ensure safe use. For this

reason, numerous important products for sport are on the Cologne List® - an initiative that identifies food supplements with a reduced risk of doping.

"We are proud to have and retain the DHB as a partner of MITOcare. The passion, determination and pursuit of excellence of our national teams perfectly reflects the values that MITOcare also stands for. We will continue to work closely with the DHB and the team doctors to ensure that the players are provided with the best possible micronutrients to reach their full potential, especially at the games in Paris. And we are confident that our products can help them achieve their goals," says Christian Burghardt, founder and CEO of MITOcare.
