# GLAZE SPECIFICATION

New Terracotta has its core strength in the wide knowledge of colours. We are always ahead of different colour expressions. A colour reaches its maximum when the pigment has been developed to the highest emotional resonance for that colour. There is so much more to our work than fine raw materials and high pigment loads. At New Terracotta, we are forging together the right balance of pigment, glaze, history, science and emotion.

The collection features 188 subtle, luminous, semi-transparent, deep, metallic colours. Each of them has a historical and artistic background.

## BASIC COLOURS

Ref.	Colour Name	Glaze Definition	Shade Variation	Long Term Crazing	Pre-Grout Seal	Shower, Saunas Steam Rooms	Pools, Lakes Fountains	Exterior Facades

### Craquelé

Craquelé is the appearance of fine cracks in the glaze, also called crackle. The size and distribution of crazing will vary from tile to tile. Crazing can be enhanced with stains or sealed to minimize the effect. Crazing is not a defect, but a decorative effect that is deliberately induced, usually known as artistic craquelé. All craquelé glazes should be sealed before grouting.

### Shade Variation

Variation is inherent to the handmade process and is intentional.

**Low** - Tile can vary slightly.

This glaze has subtle variation in tone and texture.

**Moderate** - Tile can vary slightly to moderately.

This glaze has clear and noticeable variation in tone and texture.

**High** - Tile can vary significantly.

This glaze is created by multiple layers of different colour glazes applied or glazes with extreme reactions in firing resulting in significant changes in colour, tone and texture. It is recommended that the range be viewed before selection.

**Very High** - Tile can show a dramatic and random variation.

This random glaze expression varies greatly from light to dark tones, texture and also shifts in colour.

It is recommended that the range be viewed before selection.

# GLAZE SPECIFICATION

## Types of Variation

**Tonal Variation** - From light to dark within the same colour.

A single tile can only show one tone and is not a complete representation of the glaze's tonal range.

**Textural Variation** - Textural variation refers to the smoothness or mottling of a glaze.

This includes size and density of crazing, crystal growth and other decorative techniques.

As with all types of variation, the texture will vary from tile to tile within a batch.

**Colour Variation** - Colour variation is the shift from one hue to another within one glaze.

Glazes that display shifts in colour will do so from tile to tile and with some glazes within a single tile.

## Test Support

### Long Term Crazing

According to Determination of Crazing Resistance test results, EN ISO 10545-11 / ASTM C 424-93.

### Pools, Lakes and Fountains

According to Determination of Crazing Resistance test results, EN ISO 10545-11 / ASTM C 424-93.

According to Determination of Chemical Resistance test results, EN ISO 10545-13 / ASTM C 650-04.

### Exterior Facades

According to Determination of Frost Resistance test results, EN ISO 10545-12 (limit at - 20°C).

Determination of resistance to deep abrasion	EN ISO 10545-6	1142 mm <sup>3</sup>	yes
Determination of moisture expansion	EN ISO 10545-10	0,2 mm/m	yes
Determination of slip resistance of pedestrian surfaces	CEN/TS 16165-A	16°	yes

Barefoot Test - Flooring in wet conditions where the pedestrian is barefoot.

# TRIMS

Trim tiles are finishing pieces that provide a clean execution to tiled floor, walls, windows, ceilings and countertops. Its main purpose is to hide imperfections, protect edges and cover transitions between surfaces. The New Terracotta tile trims and architectural mouldings series is a compendium of ongoing functional and aesthetic solutions tailored to the projects we have been commissioned.

#### NOTES

Available for all field tiles.

Glazed edges available by request.

Special thickness available by request.

Drawings not to scale. Measurements denoted L x H x W in cm.

Tiles are handmade, size and shape variation can be expected.

# VICTORIAN BRICKS

This style of brickwork had a surge in popularity during the Victorian and Edwardian eras and was often used on the exterior of train stations, pubs and hotels. Glazed bricks have made a comeback in modern architecture, bringing a stylish and contemporary edge to buildings.

The New Terracotta glazed brick series is offered in historic standard sizes with complementary trim pieces.
