

3 ARM POLE PACKAGE INSTRUCTIONS

Includes: Twister, 3 pole sections, pole topper and baffle

Place a screwdriver into the hole in the twister and twist 20" into ground.
Loosen the screw on the top of the twister.

Insert the FP9 (longer of the poles, with no swedges) into the twister, tighten the screw to affix to the twister.

Insert the TE14 (14" pole with one swedge) with the swedge going into the top of the FP9.

Affix the collar for the squirrel baffle to the pole at the desired height.
Recommended height of baffle is 4 feet above ground. Tighten the screws making sure the collar stays level. Slide baffle over the top of pole until it rests on the collar.

Insert the TE20 (last of the pole sections - 22" pole with one swedge) with the swedge going into the top of the last pole section attached.

Remove the 3 arm topper from packaging. Insert the base of it into the top pole section. Make sure the finial is attached and secure.

Hang your Birds Choice feeders and enjoy!
