

Designed by Lifeguards to help train in retrieval, towing and extrication from the pool.

The Pool Rescue Training Manikin is a revolutionary new product designed to innovate the way lifeguard training is conducted. This product brings together different elements of lifeguard training, allowing trainees to seamlessly practice different techniques without needing to switch between different equipment or live volunteers.

Designed specifically for lifeguard training and developed with assistance from the Royal Life Saving Society (RLSS) in the UK. This manikin has been created to allow trainee lifeguards to learn all the skills required to safely retrieve a person from the pool. This manikin combines different elements of training to allow trainees to improve response times - SAVING LIVES.

- Constructed from the same material used in Police ballistic stab vests, offering 4x the strength and abrasion resistance of 16oz canvas or P.V.C. (conforms to OEKO-TEX® Standard 100, BS EN ISO 12947-2 & 14116: 2008). High density polypropylene webbing (25mm rated to 207 Kg, 50mm rated to 440Kg).

- Buoyancy characteristics are achieved using closed cell foam and PVC pellets with s.g. 1.5.

Model	Description	Height	Weight
RLNPRJ	Youth	1.1m	16kg
RLNPR	Adult	1.6m	30kg
