

Retro Series FLH Saddlebags  
CB5100B

### **Compatibility**

These bags were made to fit 2014-present FLH models with stock saddlebag mounts. They will not fit on 2013 and older models.

### **Mounting Instructions**

To mount the bags, place the bag on the saddlebag mount rail, making sure the rail is sitting in the track on the bottom of the bag. Then align the grommets with the hardware on the bike, and tighten the fasteners through the grommets. These bags mount just like the stock FLH bags. If you are using the ¼ turn fasteners, you may want to add a washer or two to tighten the fastener if it is loose.

### **Care Instructions**

For any fabric components of the bags, we recommend applying a UV blocker in order to protect the fabric of the bags from fading. We suggest using 303 Aerospace Protectant. If your bike is kept outdoors in intense sunlight, we recommend applying about once a month. Bags have not been treated before leaving the factory. For cleaning, use mild soap and water with a brush and then rinse off.

For leather surfaces of the bag, we recommend applying a black shoe cream to restore color and luster once the bags are worn. Any brand will do, Meltonian is readily available in many stores. Leather does not need to be treated on a regular schedule, simply rub on a thin layer when you notice the leather is starting to look worn. Applying too often can lead to unsightly build up and cracking.
