

Assembling your Beauty Pod

Align the large logo on the top **Handle (A)** with the small logo on the middle **Tray (B)**. Press the middle **Tray** into the bottom of the top **Handle**, until all edges are clipped in securely.

Parts **A** and **B** will now be held together and should not come apart. Place onto the lower **Base (C)** with the logos facing the same direction as the drawers.

Secure both sections by clipping each side of the pod together until the **Clips (D)** snap into position. These can separate as you wish.
