

CHARLIE'S GLYCEMIC FRIENDLY CHICKEN BLEND

**My
Perfect
Pet**

Charlie's Glycemic Friendly Chicken Blend is 100% complete and balanced for adult dogs who require a higher protein, lower carbohydrate diet with a lower estimated glycemic load. Originally called "Low Glycemic" we were forced to rename because there is no glycemic standard established for dogs and so we can't claim that it is "low". It

was renamed "Potato Free Grain Free" but changes in USDA labeling guidelines required us to change the name yet again, so we gave it a pet's name and are calling it "glycemic friendly". There has never been any change in ingredients or formula, only the name! This blend is recommended by veterinarians for dogs with diabetes, cancer, weight loss, or those that would benefit from a lower carb or lower glycemic diet. Charlie's Glycemic Friendly Chicken Blend is 100% complete and balanced so healthy adult dogs can enjoy it too!

KEY BENEFITS

- Targeted levels of protein and fat to fuel energy and muscle mass.
- Low in carbohydrates to help maintain optimal weight.
- Lower estimated glycemic load than our standard blends.
- Delicious baked boneless skinless chicken thigh – even picky dogs love it!
- Naturally rich in Taurine and other natural Amino Acids.
- Optimal ratio of soluble and insoluble dietary fiber to maintain healthy digestive tract.
- Easily digestible for even the most sensitive stomachs.
- Rich in antioxidants to help boost immune system.
- Fresh whole foods, limited ingredients.
- Balanced minerals to promote healthy urinary tract.
- 100% human grade ingredients, manufactured to human food standards
- Chicken cooked to FDA recommended temperatures for food safety
