

# LOW PHOSPHORUS CHICKEN CARNIVORE BLEND

**My  
Perfect  
Pet™**

## FOR CATS

**Low Phosphorus Chicken Carnivore Blend** is made with boneless, skinless chicken breast and thigh and is recommended by veterinarians to lower the phosphorus levels in cats with compromised kidney function. Because we use only boneless muscle meat as the protein source (never meals or ground bones which are naturally high in Phosphorus) protein levels can remain at recommended levels to maintain energy and muscle mass. Because it does not meet AAFCO standard for Phosphorus, it is labeled for intermittent feeding only unless directed by a veterinarian.

### KEY BENEFITS

- Higher levels of protein fuel energy and muscle mass.
- Very low carbohydrates and calculated glycemic load.
- Delicious baked boneless skinless chicken breast and thigh – even finicky cats love it!
- Naturally rich in Taurine and other natural Amino Acids.
- Targeted levels of Phosphorus as recommended for cats with compromised kidney function.
- Optimal ratio of soluble and insoluble dietary fiber to maintain healthy digestive tract.
- Easily digestible for even the most sensitive stomachs.
- Whole food ingredients naturally high in moisture – no added water.
- Rich in antioxidants to help boost immune system.
- Fresh whole foods, limited ingredients.
- No bones, glutens, preservatives, artificial flavors or colors.
- 100% human grade ingredients, manufactured to human food standards.
- Chicken cooked to FDA recommended temperatures for food safety.
