

EX3

A NEW ERA IN ESPRESSO MACHINE

Thanks to its modular design and through a wide range of technical and aesthetical options, the EX3 can meet the expectations of any coffee establishment.

The contemporary, stylish and easily customisable body was the focus of the EX3 design. Internally, you will discover the familiar Expobar parts with the addition of PID & shot timer electronics. Your technicians will love the new internal layout and great accessibility to carry out servicing quickly.

The EX3 standard body is satin black with chrome feet but the outer panels can be custom painted to a colour of your choosing or you could choose to have a stylish wood kit fitted.

1gr compact pictured in upgrade custom colour.

2gr compact pictured with upgraded panels, knobs and handles.
