Cleaning Products – Jura Impressa X7S

Daily

See procedure – Daily milk system clean

Must be performed at the end of each day just before the machine is turned off

Purpose: To ensure the milk system is clean overnight so milk does not go off blocking the pathways

Use Cafetto daily milk cleaner 1 litre bottle (Prod no. 71144)
or Jura Milk System Cleaner Mini Tabs 180g (Prod no. 71150)

Weekly

See procedure – Weekly milk system clean

Performed once per week

Purpose: To remove any build up of milk fats to ensure the milk frother works correctly

Use Cafetto weekly milk cleaner – 1 litre bottle (Prod no. 71145)

When prompted

Clean machine – See procedure (Coffee system clean)

Performed only when prompted (Every 220 coffees)

Purpose: Removes coffee oil from the brewing unit and coffee path to maintain the quality of the coffee

Use Jura cleaning tablets - 6 pk (Prod no. 71111)
- 25 pk (Prod no. 71112)

See procedures – Changing the filter or Descaling the machine

Perform a filter change or descale only when prompted.

Purpose: Protects against lime scale build up inside the machine maintaining water & steam paths

Prod no.71133

9 pk – Prod no. 71121

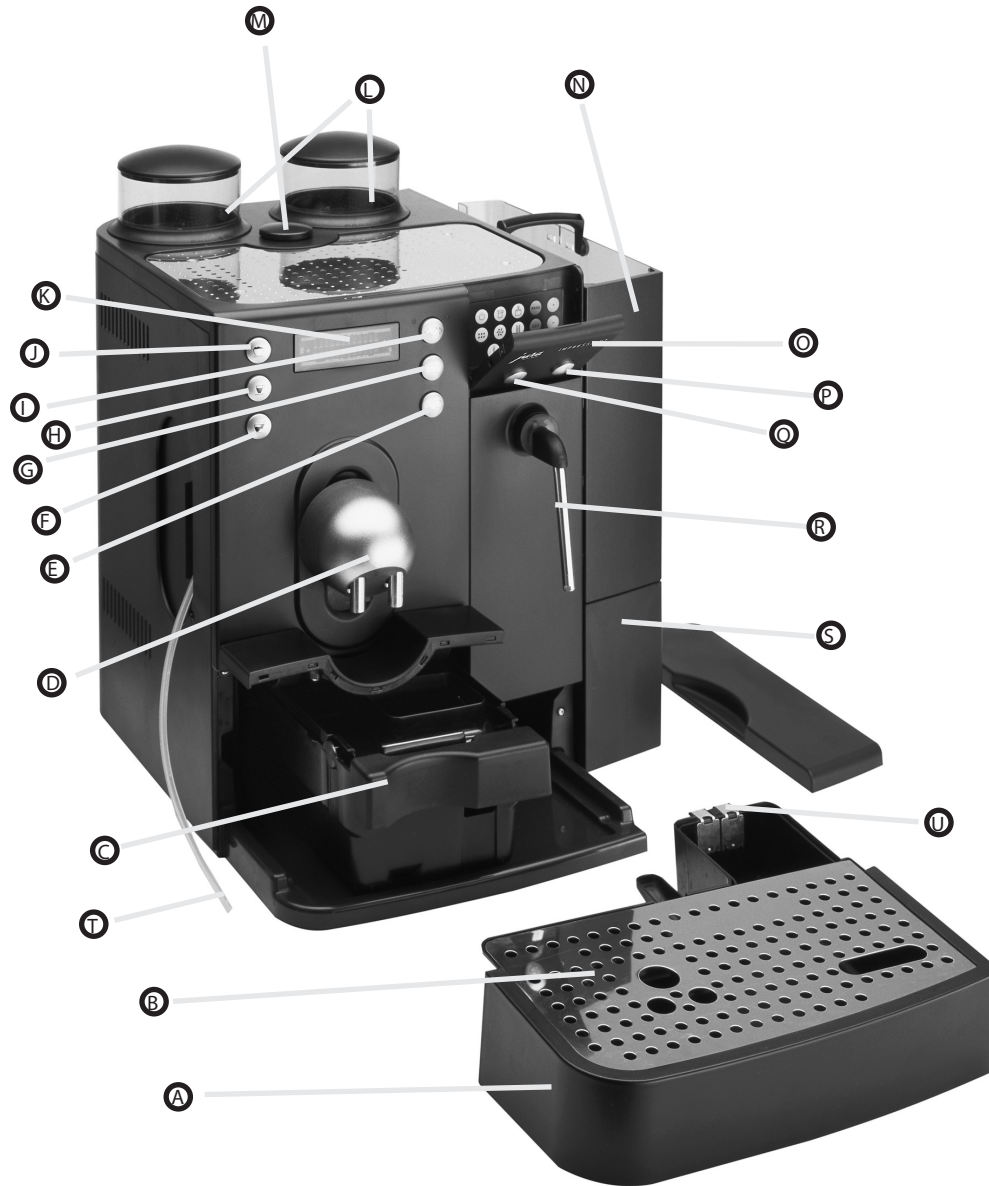

36 pk – Prod no. 71122

End of day cleaning

1. Remove the milk tube from the milk bottle. Place the milk bottle in your fridge overnight.
2. Wipe out the milk fridge with a damp cloth.
3. If the display shows **SELECT PRODUCT** follow
 - ABBREVIATED GUIDELINES: CLEANING – AUTO CAPPUCCINO.
4. If the display shows **CLEANING NECESSARY** follow
 - ABBREVIATED GUIDELINES: ENTIRE – CLEANING
5. Clean the drip tray and coffee grounds bin. Do not use a dishwasher.
6. Turn the coffee machine OFF at programming panel ON-OFF switch (A).
7. Place a sign on the machine 'Machine has been cleaned – Do not use'

Steam wand:

After frothing milk wipe the steam arm with a damp cloth. Run the steam for 2 seconds to ensure the steam arm is clean. At the end of the day check the steam arm is clean before turning off.

You hear an acoustic signal. Empty the drip tray (A) and the grounds container (C). Clean contacts at the back.

13

The machine switches off automatically. The de-scaling programme is now complete.

Trouble shooting:

- **No milk flow**
- **Milk spluttering**
- **Not filling cups**
- **Froth milk is flat / cool**

Solution:

1. Remove the dome coffee spout cover by pressing the release button up (At the base of the dome behind the coffee spouts) and pulling the dome cover off (pull towards you and down). (Fig 1 & 2)
2. Replace the air suction (Fig 3) and test the milk system using the milk button. If the problem has been resolved, order in a spare air suction (part no. 71866) otherwise go to step 3.
3. Remove the auto frother. Open the coffee spout cover (Fig 4), slide the auto frother forward (Fig 5), push the auto frother out of the housing (Fig 6 - 7) and disconnect the steam and milk tubes. (Fig 8)
4. Separate the auto frother into 6 parts. (Fig 9)
5. Soak the parts in 250ml of warm water and 15 ml of Cafetto red weekly cleaner (71145) for 30 min.
6. Remove the parts from the solution and rinse them under tap water.
7. Clean the milk, air and steam paths with the cleaning brush (part no. 71161). (Fig 10 – 14)
8. Re-assemble the auto frother and refit onto the machine.
9. Test the operation. If the problem has not been resolved descale the machine and test again. If the problem has still not been resolved call phone support on 1300 365 487.
