WHAT IS INCA GLOW

Inca Glow™ is a revolutionary smoothing system that is transforming the professional smoothing market. Formulated using natural ingredients, Inca Glow combines a unique Amino Acid Complex and Inca flower oil, rich in Omega 3, 4 and 9 and vitamins A, C and E, to form the ionic chemistry that smooths and conditions all hair types with long-lasting results.

The Inca Glow™ amino acid smoothing system is free from Formaldehyde, Glyoxylic Acid (a formaldehyde substitute) and ammonia, which aims to eliminate the possibility of any scalp irritation, with no harsh odours or unhealthy vapours. Inca Glow™ lasts up to 16 weeks with unsurpassed shine and condition.

FEATURES & BENEFITS

Inca Oil

An organic oil extracted from the seed of the Inca plant. This oil is rich in omega 3, 6 and 9, vitamins A, C and E and saturated fats.

Non-Keratin System

Inca Glow uses an Amino Acid Complex that allows the system to create long-lasting smooth results and add shine without the drying and damage sometimes associated with keratin based straightening systems.

Safe and Gentle

ABSOLUTELY Formaldehyde and Formaldehyde substitute FREE, with no harsh odours or unhealthy vapours that can be inhaled and is free from ingredients that may irritate the eyes or scalp.

Long-Lasting

Inca Glow™ lasts up to 16 weeks with unsurpassed shine and condition.

Complement the in-salon service

On the same day your clients can enjoy a lightening service prior to the smoothing service or a colour service (either demi or permanent) post smoothing service.

HAIR TYPE	STEP 1	STEP 2		STEP 3	STEP 4
	RECOMMENDED SHAMPOO TYPE	INCA GLOW MIXTURE	PROCESSING TIME	RINSE PERCENTAGE	IRON TEMPERATURE GUIDELINE
Virgin	Cleanse the hair 1-2 times using clarifying shampoo to eliminate any build-up on the hair prior to Inca Glow application	50:50	45 - 60 minutes	Rinse only until colour begins to dilute and fade, leaving approximately 20% in the hair.	204 - 232°C
Virgin Resistant	Clarifying Shampoo	50:50	Up to 80 minutes	Rinse only until colour begins to dilute and fade, leaving approximately 80% in the hair.	204 - 232°C
Previously Coloured/ Treated	Clarifying Shampoo	50:50	30 - 60 minutes	Rinse product until water runs 100% clear from the hair.	176 - 232°C
Prelightened / Damaged	Clarifying Shampoo For extremely damaged hair, a hydrating treatment is recommended prior to performing a Inca Glow Service.	50:50	Apply 1-1.5cm from the scalp to point of previous damage, process 15 minutes. Bring remaining product through the ends, process additional 15minutes.	Rinse product until water runs 100% clear from the hair.	176 - 190°C

NOTE: For previously coloured hair: set flat iron heat 10 degrees lower than recommended to begin. Turn up the heat 10 degrees at a time if needed until the iron is hot enough for the individual head of hair.

THE INCA GLOW-OUT

Add the Inca Glow-Out to your salons service menu, an express smoothing service that can last up to eight weeks. This value-added salon service allows salon guests to experience the Inca Glow™ amino smoothing system through a more temporary application, and extend the life of a previous full Inca Glow™ smoothing service.

STEP 1	STEP 2	STEP 3	STEP 4
Shampoo with a moisturising shampoo* followed by a moisturising conditioner*. Rinse 100%. Towel Dry.	Mix equal parts Inca Glow Platinum with water in an airtight misting spray bottle. Shake Well.	Lightly mist the hair brushing/ combing through out the hair. Do Not oversaturate.	Blow dry 100%. Set iron temperature according to hair type. 177 - 232°C starting low increasing by 10 degrees as needed. Use 1.5cm to 2.5cm sections.

*we recommend Awapuhi Wild Ginger Shampoo and Rinse.

NOTE: For optimal results use Professional Sulfate Free Shampoo and Conditioner and once a week Masque for aftercare.

FAQ'S

IS INCA GLOW A KERATIN SMOOTHING TREATMENT?

No. Inca Glow is a Non-Keratin smoothing system that uses an Amino Acid Complex that allows the product to provide long lasting anti-frizz effect along with smoothing and shine. Keratin treatments may have challenges fighting frizz as it is a large molecule that can be drying.

WHAT ARE THE ACTIVE INGREDIENTS IN INCA GLOW?

Inca Oil, Glycolic acid, Lactic acid and other amino acids complete the all-natural formula.

HOW LONG DOES INCA GLOW LAST?

Inca Glow lasts between 12 and 16 weeks depending on lifestyle and maintenance.

WHAT IS THE DIFFERENCE BETWEEN THE INCA GLOW AND INCA GLOW PLATINUM?

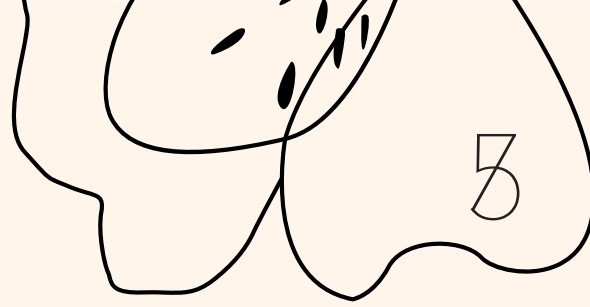

Both products have the same natural organic formula with violet pigment added to the Inca Glow Platinum to tone unwanted warmth and yellowing tones.

CAN A INCA GLOW SERVICE BE PERFORMED ON HAIR THAT HAS ALREADY BEEN CHEMICALLY TREATED?

Yes. Inca Glow is not only safe to use over previous chemical services, but also helps replenish & nourish hair that has been previously damaged.
