

NEW FOR 2021: THE OCTAGONAL FRAME

The new Octagonal series is aimed at the professional user looking for strength and quality at a very affordable price. The new frame features unique octagonal profile legs, with quick release mechanisms for releasing the tension, and a unique tensioning mechanism in the king-post to take up the slack once the canopy starts to get a bit baggy. All brackets are forged stainless steel for strength.

Canopies, walls, print and all other items are made by Instant Marquees in the UK.

LEG DETAIL

50mm x 2mm Octagonal legs with stainless steel brackets & quick-release mechanism. Note how forgings are designed to keep the weight down.

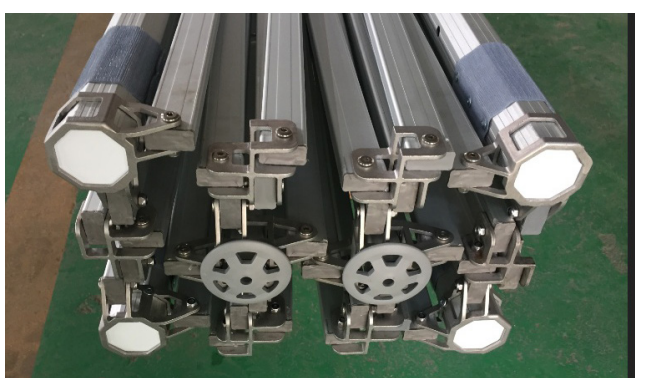

KING POST DETAIL

40 x 40mm x 2mm King Post with integral wind-er for adjusting canopy tension & stainless steel brackets for strength

FOOTPLATE DETAIL

Stainless steel footplates. These footplates can be modified to fit the ground anchor system where required.

FITTINGS DETAIL

Quality fittings throughout make for a strong and reliable frame in commercial use
