

PAPER FILIGREE PAINTING

01 02 03 04 05 06 07 08

Please confirm the color position according to the color number of the paper, corresponding to the color of the reference picture before you have started the process. For the similar colors that are not easy to distinguish in this process, we have made a color distinction map, please refer the directions. The EVA board may have creases during transportation, which is not a quality problem, and it also can be used after being flattened.
