

TECHNICAL DATA SHEET

Reusable Face Shield

Designed and Manufactured by Flexcim Manufacturing Services Inc. in Edmonton Alberta.

Product Details

Durable and lightweight, this face shield features a protective visor that shields the user from splashes from above while still allowing good air flow and ventilation to prevent fogging. The frame is flexible and comfortable. A non-porous elastomer is used for the forehead pad and adjustable strap. All components can be removed, disinfected and reused. This product considers relevant aspects of CSA A94.3-20 to provide barrier protection to the face.
