How We Ship Your Seeds

Most of our seeds are sent to you in moisture resistant re-closable bags. Each bag is sized for the amount of seed inside and can keep the seed safe year after year with proper storage.

By using these durable bags, we are helping to ensure seeds stay at their peak longer and make things easier for you, the grower.

Symbol Guide

New for 2024

Heirloom—At least 100 years old. Passed down for generations. Suitable for seed savers.

Open Pollinated—suitable for seed savers.

Not suitable for seed savers.

From our Italian Gourmet Collection

DP Seeds LLC Variety

Flowers suitable for cutting.

Pollinator.

Suitable for microgreens.

One of our favorites

Organic Seed

We are certified as an organic handler by Baystate Organic Certifiers

Look for this symbol throughout our catalog for Certified Organic Varieties.

Even though most of our conventional seeds are untreated, please request your seeds to be untreated when placing your order.

DP Seeds varieties that have No Organic Equivalent and are available as Untreated Seeds for many organic programs.

We Are Proud Signers of the Safe Seed Pledge.

The Safe Seed Pledge:

"Agriculture and seeds provide the basis upon which our lives depend. We must protect this foundation as a safe and genetically stable source for future generations. For the benefit of all farmers, gardeners and consumers who want an alternative, we pledge that we do not knowingly buy, sell or trade genetically engineered seeds or plants.

The mechanical transfer of genetic material outside of natural reproductive methods and between genera, families or kingdoms, poses great biological risks as well as economic, political, and cultural threats. We feel that genetically engineered varieties have been insufficiently tested prior to public release. More research and testing is necessary to further assess the potential risks of genetically engineered seeds. Further, we wish to support agricultural progress that leads to healthier soils, genetically diverse agricultural ecosystems and ultimately healthy people and communities."

Dear Valued Customers,

Welcome to a New Year in the Garden! 2023 was crazy year in the garden and field; drought, downpours, excessive heat and late frosts. But when the weather sends us challenges, we rise to it!

This past season we trialed many varieties that did great even in the most difficult situations. Stop Sign Zinnias stood up to the heat and were show stoppers all season long. Speckled Roman tomatoes are still producing beautiful fruits as we write this in mid-October here in Connecticut. And Butterkin winter squash ... the baskets are overflowing (this is one of Gwen's favorites)

Have you heard the new color for this year is "Cyber Lime"? We've got two new zinnia mixes that highlight those hues; Key Lime and Lemon Meringue. We even have Shishito peppers which offer that same shade with a surprise heat in random fruits (do you feel lucky?)

And we finally found a family of "warted" pumpkins that are hard shelled and hold up much better than others; Goose Bumps and Baby Bumps.

Thank you again for choosing New England Seed Co as your source for Good Seed and a Glad Harvest! ~ The NE Seed Family.

These are a few of our amazing new varieties for 2024!

Baby Bumps F1 Hybrid

(2-3 lbs.) Smallest member of the warted pumpkin family. Slightly oblong fruits with hard shell warts all over its skin. Warts average 80% orange, 20% green. 6-8' vines are very prolific.

See "Baby Bumps" on page 36

Jade F1 Hybrid

(2-3 lbs.) A "kabocha like" winter squash with a slight button on the bottom. Semi-bush plant bares 3-5 fruits per vine. Each deep green fruit has gray ribs and rich orange flesh. Described as "nutty with a maple sweetness", perfect for roasting or soups. Long keeper.

See "Jade" on page 48

Goose Bumps F1 Hybrid

(2-lbs) Pale orange with pale speckles and dark orange stripes along the ribs.

See "Goose Bumps" on page 37

Speckled Roman (I) HL

(6-8oz.) Deep red Roma-type tomato flecked with golden yellow stripes. Flesh is dense and flavorful with few seeds. Great for both fresh eating and processing.

See "Speckled Roman" on page 57

White Lightning F1 Hybrid

(12-16 lbs.) This white pumpkin is the new, larger version of Moonshine. White skin with a strong dark green handle. Skin can be smooth or bumpy with deep ribbing. Harvest when first mature and protect from the sun to hold white color. Averages 3-5 fruits per vine.

See "White Lightning" on page 37

Red Cherry

(6-10"). Beautiful mahogany red petals have a golden edge with lemon yellow eye. Each long-lasting double flower averages 2" across, with delicate ruffling. Plants are great for containers, borders and are deer resistant. Drought tolerant.

See "Red Cherry" on page 72

Butterkin F1 Hybrid

(3 lb.) Is it a butternut squash or a pumpkin? It's the best of both. Perfect size for two people, about 3 pounds, creamy tan rind with vibrant orange flesh that's both sweet and buttery.

See "Butterkin" on page 46

Pro-Cut Pollenless Series Gold Lite

(4-6") Florist quality sunflowers for your garden. "An explosion of color that grabs your eye". Deep golden petals surround a light green center eye. Now resistant to Powdery Mildew.

See "Gold Lite" on page 77

Shishito OP

50-200 SHU. A mildly hot pepper, BUT it's said that 1 out of every 10 peppers will be 'spicy-hot', which is why snacking on them can be an adventure! The 24" plants are sturdy and produce continuously until frost. Suitable for containers.

See "Shishito" on page 32

Key Lime Pie Mix

(30-40"). Luscious combination of white and chartreuse green for a cool feel, this mixture is Polar Bear and Envy varieties. Each bloom averages 4" wide and is fully double. Native to Mexico, these hold up well under drought conditions.

See "Key Lime Pie Mix" on page 80

Triple Elite F1 Hybrid

(18-22 lbs.) Oval shaped seedless triploid. Medium green rind with wide dark green stripes. Luscious red flesh is sweet and firm.

See "Triple Elite" on page 59

Stop Sign Mix

(30-40") Show stopping mixture of Cherry Queen and Polar Bear. Each bloom measures 4-5" across. Long blooming and drought tolerant, a great combo for pollinators and cutting. Mix with our Blue Salvia and your bouquets will be ready for July 4th!

See "Stop Sign Mix" on page 80

Amaranth, Garnet Red

Please visit our website: www.neseed.com

Arugula

Annual. 15,000 seeds/oz.; 7-14 days, 68°F.
32 days baby, 52 days full size.

Arugula/Roquette *OP* (*Eruca sativa*)

(36") A leafy green with a slightly pungent, peppery flavor. Young leaves are used fresh and mature greens can be cooked. Dislikes heat so plant a spring or fall crop.

40210 (price by weight)
Retail pack/\$1.89 • 1 oz./\$3.95
1/4 lb./\$7.95 • 1 lb./\$19.95
5 lb./\$59.00

Arugula/Roquette *OP* (*Eruca sativa*)

This is a delicious strain raw or cooked. It has a pleasant flavor but isn't too peppery.

55000 (price by weight)
Retail pack/\$2.59 • 1/2 oz./\$4.95
1 oz./\$6.95 • 1/4 lb./\$15.95
1 lb./\$29.00

Astro *OP* (*Eruca sativa*)

This is the mildest flavored arugula we sell. It is our best variety for baby leaf production with its beautiful spoon shaped leaves.

30099 (price by weight)
1/4 oz./\$4.95 • 1 oz./\$9.95
1/4 lb./\$16.50 • 1 lb./\$49.95

Olivetta Rocket *OP* (*Diplotaxis tenuifolia*)

5-7 days.
This variety grows wild in Italy. The plants are small with smooth, narrow, medium green leaves. They have a strong but pleasant flavor. 3 g/pkt.

50206
Retail pack/\$5.29

Red Streaked Wild Arugula *OP*

Striking red veins on wild arugula with the same peppery bite and aroma.

40215 (price by weight)
1/8 oz./\$9.95 • 1/2 oz./\$29.00
1 oz./\$42.00 • 1/4 lb./\$129.00
1 lb./\$399.00

Rocket/Italian Cross *OP*

(*Eruca sativa*) (*Rucola Coltivata*)

A versatile gourmet green with a peppery flavor. Stands alone well or mix with other greens for delicious salads. Can also be cooked like spinach. Flowers are edible. Long, dark-green leaves are cut above the collar for rapid regrowth. Grow for spring and fall crop. 15 g/pkt.

50005 (price by weight)
Retail pack/\$5.29 • 1/2 oz./\$5.95
1 oz./\$7.95 • 1/4 lb./\$19.00
1 lb./\$55.00 • 5 lb./\$199.00

Wild Child *OP*

(*Diplotaxis tenuifolia*) (*Rucola Selvatica Sel. Frastagliata*)

Found in the wild in Italy. Short, thin, serrated leaves which are bright green in color and have an intense but pleasant flavor and aroma. The plant grows well in any type of soil and requires little care. 3 g/pkt.

50205 (price by weight)
Retail pack/\$5.29

Artichoke

650 seeds/oz.

Start indoors 8-12 weeks before last spring frost. 10-14 days, 70-80°F

Romanesco *HL*

The "chokes" on this plant are large and round with lots of edible flesh. They are greenish-purple with excellent flavor. The plants are compact and high yielding. In warm climates or with winter protection they can produce for 4-5 years. This is a very old variety and will have a small percentage of off types that should be rogued out. 3 g/pkt.

50000
Retail pack/\$5.29

Asparagus

800 seeds/oz. (1 lb. will provide enough transplants for 1 acre). 21 days, 68-86°F.

Mary Washington *OP*

The most popular asparagus with home gardeners and farmers. Spears are straight and green with tight tips. The plants start producing early and can be harvested for up to two months. *Some resistance to R and Blight.*

33980 (price by weight)
1/2 oz./\$7.95 • 1 oz./\$11.00
1/4 lb./\$25.00 • 1 lb./\$72.00
5 lb./\$279.00

Beans

EZ from Seed.

All bean orders 25 lbs. and over are shipped ground only. All our bean varieties are halo blight free.

Bush, Green

(*Phaseolus vulgaris*)

1,600 seeds/lb.; 70 lbs./acre.
7-14 days, 70-80°F.

Bush Blue Lake 274 *OP*

The much beloved standard for green beans. The round pods are dark green, straight and stringless. They are 5 1/2 - 6 1/2" long. *The plants are widely adapted and resistant to BMV (common and NY strain).* 58 days.

30030 (price by weight)
Retail pack/\$1.99 • 1/4 lb./\$5.95
1/2 lb./\$7.95 • 1 lb./\$11.00
5 lb./\$39.00 • 25 lb./\$170.00

Bush Blue Lake 274 *OP*

55007 (price by weight)
Retail pack/\$2.59 • 1/4 lb./\$10.95
1/2 lb./\$13.00 • 1 lb./\$18.00
5 lb./\$75.00

Corallo *OP*

This is an excellent flat podded Italian string bean. It is medium green and has a rich flavor. 58 days. 60 g/pkt.

50007
Retail pack/\$5.99

All bean orders 25 lbs. and over are shipped ground only.
All our bean varieties are halo blight free.

Jade OP

Round-podded beans are straight and dark green. They are firm but sweet and tender with excellent flavor. The pods are 6-7" long and easy to harvest. The plants are widely adapted and high yielding. *High resistance to BMV (common), Intermediate resistance to Curly Top and R.*

30033 (price by weight)
Retail pack/\$1.99 • 1/4 lb./\$9.95
1/2 lb./\$12.00 • 1 lb./\$17.00
5 lb./\$79.00 • 25 lb./\$270.00

Petite Filet, French OP

2,800 seeds/lb.

Very fine bean for gourmet cooks. You would find this bean served in the best French restaurants. Long and slender. 58 days.

30069 (price by weight)
Retail pack/\$1.99 • 1/4 lb./\$5.95
1/2 lb./\$7.95 • 1 lb./\$11.00
5 lb./\$39.00 • 25 lb./\$170.00

Pregiato OP

Filet bean. This is a very productive variety and easy to harvest. The foliage doesn't hide the beans. The bright green pods are 6" long and very tender. The seeds stay small and the pods edible for a long time on the plant. 55 days. 60 g/pkt.

50009
Retail pack/\$5.99

Provider OP

Excellent green bean for the professional grower. Medium green pods are 5-6" long, straight and tender. Plants are widely adaptable and heavy yielding.

They are resistant to BMV (common and NY-15 strains), PM and R. Treated and untreated seed available. 50 days.

30031 (price by weight)
1/4 lb./\$5.95 • 1/2 lb./\$7.95
1 lb./\$11.00 • 5 lb./\$39.00
25 lb./\$170.00

Roma II OP

Flat podded Italian bean with unique flavor. 5" smooth green pods with white seed are slow to develop seeds and fiber. They keep their color and flavor when canned or frozen. *Resistant to BMV (NY strain).* 59 days.

30035 (price by weight)
Retail pack/\$1.79 • 1/4 lb./\$5.95
1/2 lb./\$7.95 • 1 lb./\$11.00
5 lb./\$39.00 • 25 lb./\$170.00

Royal Burgundy OP

Easy to grow and pick and also germinates well in cooler soils. The 5" round stringless purple pods turn dark green when cooked. Especially good for freezing. *Resistant to bean beetles.* 51 days.

30058 (price by weight)
Retail pack/\$1.99 • 1/4 lb./\$5.95
1/2 lb./\$7.95 • 1 lb./\$11.00
5 lb./\$39.00 • 25 lb./\$170.00

Tendergreen Improved OP

Heat-tolerant snap bean with 6-7" round and meaty, dark-green pods. Heavy, prolonged producer. Best when picked at 6" stage. *Resistant to BMV.* 57 days.

30000 (price by weight)
Retail pack/\$1.99 • 1/4 lb./\$5.95
1/2 lb./\$7.95 • 1 lb./\$11.00
5 lb./\$39.00 • 25 lb./\$170.00

Tendergreen OP

55008 (price by weight)
Retail pack/\$2.59 • 1/4 lb./\$10.95
1/2 lb./\$13.00 • 1 lb./\$18.00
5 lb./\$75.00

Bush, Yellow

(*Phaseolus vulgaris*)

Cherokee Wax OP

Yellow-podded bean produces an abundance of 5-6" long nearly round pods. They are stringless at all stages and have black seeds. Delicious fresh, canned or frozen. *Resistant to BMV (common and NY strains) and R.* 58 days.

30070 (price by weight)
Retail pack/\$1.99 • 1/4 lb./\$5.95
1/2 lb./\$7.95 • 1 lb./\$11.00
5 lb./\$39.00 • 25 lb./\$170.00

Golden Wax Improved OP

The flat podded beans are 5 1/2" long. They have a delicate flavor and can be eaten fresh, canned or frozen. The seeds are white with brown eyes. The plants are very productive. Home garden variety. *Resistant to BMV and R.* 52 days.

30006 (price by weight)
Retail pack/\$1.99 • 1/4 lb./\$5.95
1/2 lb./\$7.95 • 1 lb./\$11.00
5 lb./\$39.00 • 25 lb./\$170.00

Golden Wax HL

Stringless golden yellow pods with a mild, buttery flavor. The plants are very adaptable and productive. Excellent when fresh, frozen or canned. 55 days.

55005 (price by weight)
Retail pack/\$2.59 • 1/4 lb./\$10.95
1/2 lb./\$13.00 • 1 lb./\$18.00
5 lb./\$75.00

Gold Rush OP

This is our favorite wax bean. The 6" creamy yellow pods have white seeds and are produced in an easy-to-pick cluster. They are produced in one main flush but hold their quality for a long time. *Resistant to BMV (common and NY 15 strains).*

30007 (price by weight)
Retail pack/\$1.99 • 1/4 lb./\$5.95
1/2 lb./\$7.95 • 1 lb./\$11.00
5 lb./\$39.00 • 25 lb./\$170.00

Rocquencourt OP

This bean is buttery and crisp, fresh or cooked. The 4-5" pods are all purpose, eat them fresh, canned or frozen. Black seeds. 55 days. 60 g/pkt.

50006
Retail pack/\$5.99

Cowpea aka Southern Bean

(*Vigna unguiculata subsp. unguiculata*)

2,100 seeds/lb.; 50 lbs./acre. 7-14 days. 70-80°F.

Dolico OP

This is an Italian cowpea. The pods are at their most delicious when 10" long. They are excellent fresh or frozen. Stronger flavor than American maintained cowpea varieties. 82 days. 60 g/pkt.

50008
Retail pack/\$5.99

California Blackeye OP

This cowpea grows on a compact bush plant that sets pods high on the plant. The seeds are cream with a black eye. Plants are wilt resistant. 60 days fresh, 80 days dried.

30086 (price by weight)
1/4 lb./\$6.95 • 1/2 lb./\$7.95
1 lb./\$15.00 • 5 lb./\$49.00
25 lb./\$219.00

Top Pick Brown Crowder OP

Upright bush plant with prolific set of pods on the top where they are easy to see and harvest. 2-3 heavy flushes of pod set. Pick when light purple for shelling. Easy to shell at all stages. Plants can be grown 8-12" apart for the best productivity. 50-55 days fresh.

30020 (price by weight)
1/4 lb./\$6.95 • 1/2 lb./\$7.95
1 lb./\$15.00 • 5 lb./\$49.00
25 lb./\$219.00

Top Pick Cream Pea OP

5,000 seeds/lb. Upright bush plant with prolific set of pods on the top where they are easy to see and harvest. The plants will have 2-3 heavy flushes of pod set. Pick when light purple for shelling. Easy to shell at all stages. Plants can be grown 8-12" apart for the best productivity. 50-55 days fresh.

30040 (price by weight)
1/4 lb./\$6.95 • 1/2 lb./\$7.95
1 lb./\$15.00 • 5 lb./\$49.00
25 lb./\$219.00

Top Pick Pinkeye PurpleHull OP

The best Pinkeye PurpleHull variety. The bush plants have pods at the top of the plant for easy harvesting. The pods turn purple when they are at the fresh shelling stage. 55-58 days fresh, 65-68 dry.

30087 (price by weight)
1/4 lb./\$6.95 • 1/2 lb./\$7.95
1 lb./\$15.00 • 5 lb./\$49.00
25 lb./\$219.00

Edamame/ Soybean

(*Glycine max*)

80 seeds/oz. 1 lb./300 ft. of row. 7-14 days. 55-60°F soil temperature. Do not presoak seeds. Use inoculant for best results.

Midori Giant OP

This excellent variety is always a winner in edamame trials. It is widely adaptable, large seeded and productive. The pods have 2-3 seeds and should be harvested as they start to turn yellow. Good for professional growers and home gardeners. 75 days.

31329 (price by weight)
1/4 lb./\$6.95 • 1/2 lb./\$7.95
1 lb./\$15.00 • 5 lb./\$49.00
25 lb./\$219.00

Midori Giant OP

55027 (price by weight)
1/2 oz./\$4.95 • 1 oz./\$7.95
1/4 lb./\$24.95 • 1 lb./\$72.00
5 lb./\$325.00

Lima Bean

(*Phaseolus lunatus*)

960 seeds/lb. 70 lbs./acre; 60 seeds/oz. 7-14 days. 70-80°F.

Fordhook 242 OP

Bush plants. AAS winner. Easy to shell and has a nutty flavor. The pods have 3-5 greenish-white seeds each. Productive in northern and southern states including maritime climates. 72 days.

30026 (price by weight)
Retail pack/\$1.89 • 1/4 lb./\$7.95
1/2 lb./\$11.00 • 1 lb./\$16.00
5 lb./\$50.00 • 25 lb./\$199.00

Jackson Wonder Butterbean HL

1,100 seeds/lb. Buttery tasting bush lima or butterbean with 3" dark-green pods. Seeds are buff colored with purple mottling. Heat and drought tolerant. 65 days.

30046 (price by weight)
Retail pack/\$2.19 • 1/4 lb./\$7.95
1/2 lb./\$11.00 • 1 lb./\$16.00
5 lb./\$50.00 • 25 lb./\$199.00

Pole, Snap

(*Phaseolus vulgaris*)

1,600 seeds/lb.; 70 lbs. acre. 7-14 days. 70-80°F.

Albenghino

A true Italian pole bean imported directly from Italy. This 'Romano type' climbing vine is prolific, producing masses of large tender flat pods with exceptional flavor. 75 days. 50 seeds/pkt.

50013
Retail pack/\$5.99

Kentucky Wonder Green

HL

Old-fashioned variety with an extra-long harvest season. The most widely grown green bean has 8-9" long oval pods with a meaty texture and brown seeds. Great fresh, canned or frozen. R resistant. 65 days.

30090 (price by weight)
Retail pack/\$2.19 • 1/4 lb./\$7.95
1/2 lb./\$11.00 • 1 lb./\$18.00
5 lb./\$55.00 • 25 lb./\$219.00

Kentucky Wonder Green

HL

55006 (price by weight)
Retail pack/\$2.59 • 1/4 lb./\$8.95
1/2 lb./\$10.00 • 1 lb./\$14.00
5 lb./\$59.00

Pole Blue Lake FM-1K OP

This excellent and productive bean is stringless at all stages. The vines only grow 5-6' tall. The pods are round, smooth and dark green. Use the pods fresh, frozen or canned. The white seeds are delicious as baked beans and in soup. BMV resistant. 63 days.

30032 (price by weight)
Retail pack/\$2.19 • 1/4 lb./\$7.95
1/2 lb./\$11.00 • 1 lb./\$18.00
5 lb./\$55.00 • 25 lb./\$219.00

Rattlesnake OP

7" long pod with dark green and purple steaks. A truly beautiful bean. Drought resistant for home and fresh market use. 63 days.

30043 (price by weight)
1/4 lb./\$7.95 • 1/2 lb./\$11.00
1 lb./\$18.00 • 5 lb./\$55.00
25 lb./\$219.00

Yardlong OP

(*Vigna unguiculata subsp. sesquipedalis*)

Robust vines that climb like pole beans produce unusual and delicious, stringless pods up to a yard long with a nutty flavor similar to asparagus. 80-90 days.

30096 (price by weight)
Retail pack/\$2.49 • 1 oz./\$7.95
1/4 lb./\$21.00 • 1/2 lb./\$31.00
1 lb./\$49.00

All bean orders 25 lbs. and over are shipped ground only.
All our bean varieties are halo blight free.

Runner Beans

(*Phaseolus vulgaris*)

Runner beans grow 3-5' tall depending on climate, weather and growing method. They are old fashioned beans and will only be stringless when young. Flowers are edible. 7-14 days. 70-80°F.

Mountain Half Runner OP

2,200 seeds/lb.

This flavorful bean is delicious fresh, canned, frozen or shelled. It yields heavily in cooler climates. Harvest the pods when 4" long and still stringless. *BMV (common strain) resistant*. 60 days.

30060 (price by weight)

1/4 lb./\$5.95 • 1/2 lb./\$7.95

1 lb./\$11.00 • 5 lb./\$39.00

25 lb./\$170.00

Pink Half Runner OP

2,000-2,200 seeds/lb.

Sometimes called Peanut Bean because the dried beans taste nutty. This beautiful bean can be eaten fresh as a snap bean, canned or dried when mature.

50 days fresh bean, 85 days dry beans. Edible flowers.

30061 (price by weight)

1/4 lb./\$5.95 • 1/2 lb./\$7.95

1 lb./\$11.00 • 5 lb./\$39.00

25 lb./\$170.00

Scarlet Emperor HL

(*Phaseolus coccineus*)

500 seeds/lb.

Scarlet runner beans have a richer sweeter flavor than green beans. The vines are so stunning they are grown as an ornamental. Harvest the pods when 6" long for snap beans or let mature to 10" long and harvest for dried beans. The vines grow up to 10' tall and are covered with edible scarlet flowers. 65 days for snap beans.

Broom Corn Mix *OP*

20,000-24,000 seeds/lb.
(8-9') Mixture of different broom corn. Colors include gold, red-bronze, brown, black, burgundy, white/cream and natural. These seeds form heads at the top of the plant (instead of a tassel) length 24-36". 100-110 days.

30860 (price by weight)
1/2 oz./\$5.95 • 1 oz./\$7.95
1/4 lb./\$17.00 • 1 lb./\$45.00

Cucumber

1,000 seeds/oz.; 2-3 lbs./acre; 7 days, 72°F
Start early indoors and transplant after 3-5 weeks or sow directly outside when soil temperature reaches 72°F.

Parthenocarpic

sets fruit without pollination.

Gynoecious

plants only produce female flowers and need another variety of cucumber as a pollinator.

Burpless Type

Garden Sweet *F1 Hybrid*

(10-12" long) A crisp and mild cucumber that can be grown in the greenhouse and outside. It has smooth, medium green skin. The vines are vigorous and prolific. *Tolerant of DM and PM.* 55 days.

31110 (price by weight)
1/4 oz./\$8.95 • 1/2 oz./\$11.00
1 oz./\$16.00 • 1/4 lb./\$49.00
1 lb./\$160.00

Mini-Me *F1 Hybrid*

★ Sandy Fav!

These Beit Alpha cucumbers are perfect for snacking. They grow only 3-4" with shiny smooth green skin and a mild, burpless flesh. Very prolific plants can grow over 10' long and are both gynoecious and parthenocarpic. Each node will produce 2-5 uniform fruits. Suitable for greenhouse or garden. *Resistant to CMV, DM, PM.* 45 days.

31195 (price by seed count)

Retail pack/\$5.99

How We Ship Your Seeds

Most of our seeds, with the exception of our retail packets, are sent to you in moisture resistant re-closable bags. Each bag is sized for the amount of seed inside and can keep the seed safe year after year with proper storage.

By using these durable bags, we are helping to ensure seeds stay at their peak longer and make things easier for you, the grower.

Gourd

10-15 days, 70-75°F. Start early indoors. Soak seeds in warm water overnight before seeding. Can also be seeded directly in the field in warm climates after soil temperature is 72°F.

also see *Italian Edible Gourd* in our *Summer Squash* Section.

Apple *OP*

100,000/\$369.00

Red Creole OP

Red Creole is a short day, Granex shaped onion for the Southern market. Red Creole exhibits red flesh with excellent storage capability. Not a sweet onion, but one that is slightly pungent. *PR resistance*. 110 days.

31791 (price by weight)
1 oz./\$9.95 • 1/4 lb./\$23.00
1 lb./\$59.00 • 5 lb./\$219.00

Sapelo Sweet F1 Hybrid

Sweet Granex with early maturity in the Vidalia® production area. Tops are dark green with 7-8 leaves with 2 skins. Also features a light bronze, tight skin and firm, wide interior rings. *Moderate tolerance to PR*.

31773 (price by seed count)
1,000/\$11.95 • 5,000/\$39.00
10,000/\$59.00 • 50,000/\$239.00
100,000/\$369.00

Timon F1 Hybrid

Timon is a yellow Grano onion that is large with a mild taste. This onion features good uniformity and high yields. *Medium tolerance to PR*.

31778 (price by seed count)
1,000/\$12.95 • 5,000/\$49.00
10,000/\$75.00 • 50,000/\$259.00
100,000/\$429.00

White Phantom F1 Hybrid

This early, short-day hybrid white onion features excellent foliage and a high percentage of single centers. Large/jumbo bulb size. *PR resistance as well as high heat and disease tolerance*. 110-155 days.

31775 (price by seed count)
1,000/\$11.95 • 5,000/\$39.00
10,000/\$59.00 • 50,000/\$239.00
100,000/\$369.00

Yellow Granex PRR

F1 Hybrid

This is the onion that started the Vidalia revolution. It is a large, sweet, firm yellow onion with a flattened shape. It separates beautifully into rings and is fantastic cooked or raw. Yellow Granex is the gold standard in Southern states and Hawaii for sweet onions. Not recommended for storage.

31770 (price by weight)

Black Pearl OP

30,000 SHU. 2006 AAS Winner (14") This is a black-leaved ornamental pepper with HOT fruit. Fruits are 3/4" with a rounded shape and ripen from black to red. Leaves are greenish when young but turn glossy black at maturity with good light and heat.

15274 (price by seed count)
25/\$10.95 • 50/\$18.00 • 100/\$31.00
500/\$130.00 • 1,000/\$199.00

Carolina Reaper

F1 Hybrid

THE HOTTEST PEPPER KNOWN TO DATE! The Scoville Heat Units scale had to be increased in 2013 to accommodate this variety. 1,640,000-2,200,000 SHU. Developed by Ed Currie, the plants can grow 4' tall and wide. Each plant will produce an average of 30 fruits, each measuring 2-3". Mature fruits are deep red and bumpy with a scorpion looking stinger on the end (appropriately so). The taste is described in the Guinness Book of World Records as: fruity sweet, immediately followed by the bite of 'molten lava'. Gloves should be worn when handling any part of the fruits when ripe. 90-100 days to fruit, additional days to fully ripen (which can be done after harvest).

32067 (price by seed count)
25/\$8.95 • 100/\$25.00 • 500/\$79.00
1,000/\$99.00 • 5,000/\$419.00

Cayenne Large Red Thick OP

Edible Seed

Pepitas F1 Hybrid

2016 National AAS winner. Pumpkin Pepitas have a sweet flesh that can be eaten baked or raw, but these beautiful pumpkins are not typically grown for their flesh or even as ornaments. Their treasure is in the delicious hull-less seeds they produce. 'Naked' seeds are much easier to eat fresh or roasted (no hulls to remove), are very nutritious and high in protein. Disease resistant vines are typically 4-6 feet producing numerous 9-12 pound round fruits. Each fruit is deep orange streaked with green and packed with seeds. Grow it for a fall decoration, succulent flesh or nutty seeds! 180 seeds/oz and ave 4-6 fruits/vine. 90 days.

32511 (price by weight)

Tours HL

(Citrouille de Touraine)

(16-18 lbs.) This is a beautiful, upright, oval pumpkin that adds height and a different shape to fall displays. It is dark green with pale green striping and has pale yellow flesh. Tours has a long history of use in France for pickling, soups, jam and animal feed. The extremely large seeds (about 80 per ounce) have medicinal properties for people and animal and produce a tremendous amount of oil when pressed. The fruit will store for 5 months. 110 seeds/oz and 2-3 fruits/vine. *C. pepo*. 95 days.

Tomato

Check out www.neseed.com for more varieties.
9,000-11,000 seeds/oz. Sow indoors 3-5 weeks before predicted last frost. Transplant after last frost. Days listed are from transplant to first fruits.

(D) Determinate

Bush or spreading plants that can be left unsupported or put on short poles, trellises and in cages. They produce one main crop. Do Not Prune.

(I) Indeterminate

Vining plants that are best when staked and pruned. Can also be used in tall cages. They produce fruit continuously.

(SD) Semi Determinate

Between Indeterminate and Determinate in height. Large sturdy plants benefit from light pruning and support since fruit continues to be produced after one large main crop.

* Brix is a measure of sweetness.

Large/Salad

Abe Lincoln (I) *OP*

(8-12 oz.) Extraordinary large fruited tomato that thrives in the southern states. Fruits are large and deep red with no cracks or seams. They are sweet and solid with very few seeds. 85 days.

5,000/\$389.00 • 10,000/\$675.00

Rutgers (SD) OP

(4-6 oz.) Popular old favorite with smooth, firm, globe-shaped fruits. Sturdy plants with good cover. 82 days. *Resistance to F.*

33540 (price by weight)
1/8 oz./\$6.95 • 1/2 oz./\$13.00
1 oz./\$17.00 • 1/4 lb./\$55.00
1 lb./\$175.00

Siberian (D) OP

(5 oz) Early, bright red fruits capable of setting at 38 F. Grows well in the northern states and areas with shorter growing seasons. Excellent choice for a container. 48-50 days.

33641 (price by weight)
1/8 oz./\$10.95 • 1/2 oz./\$29.00
1 oz./\$39.00 • 1/4 lb./\$119.00
1 lb./\$399.00

Stupice (I) HL

(2-4 oz.) This very early variety originates from former Czechoslovakia. Potato-leaf plants produce an abundance of sweet & tangy, deep red fruits in clusters. The plants will set fruit in cool temperatures and continue to produce right until frost. Plants require support for best production. 60 days from transplant.

33643 (price by weight)
1/8 oz./\$10.95 • 1/2 oz./\$29.00
1 oz./\$39.00 • 1/4 lb./\$119.00
1 lb./\$399.00

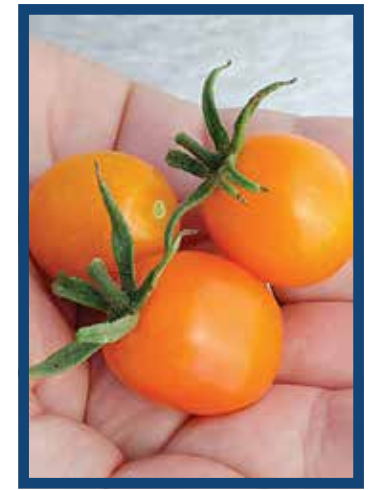

Sunny Boy F1 Hybrid (D)

(5-7 oz.) Globe shaped firm yellow fruits ship well. Excellent for East Coast stake culture. Nice bright flavor and few seeds. Productive in many different climates. 70 days.

33646 (price by weight)
1/32 oz./\$9.50 • 1/8 oz./\$29.00
1/2 oz./\$75.00 • 1/4 lb./\$399.00
1 lb./\$1,399.00

Small Fruited

Average fruit size 1 oz.

Amarillo Cherry

F1 Hybrid (I)

(1/2 oz.) Golden cherry/cocktail tomato that can be grown in the greenhouse or open field. Early maturing that changes from yellow to gold when mature. 20 to 80 fruit per cluster. *Tolerant to TMV, V and F Race 2.* 75 days.

32880 (price by seed count)
50/\$14.95 • 100/\$20.00
1,000/\$140.00 • 5,000/\$539.00

Baby Cakes Cherry

F1 Hybrid (D)

(1 3/4-2 3/4 oz.) Baby tomato with a natural salty flavor that was by far the best tasting variety in our trials this year. A great determinate tomato that just keeps producing. Does well in open field or on short stake culture. Tolerant to cracking and heat. *Tolerances to F 2, V, TSWV.*

33412 (price by seed count)
50/\$14.95 • 100/\$20.00 • 500/\$79.00
1,000/\$119.00 • 5,000/\$459.00

Black Cherry (I) *OP*

(1 oz.) This is the blackest of the cherry tomatoes. It has the typical rich tomato flavor of the black varieties. 65 days.

33417 (price by weight)
 1/16 oz./\$10.95 • 1/8 oz./\$22.00
 1/2 oz./\$64.00 • 1/4 lb./\$219.00
 1 lb./\$799.00

Chadwick Cherry (I) *HL*

Developed by Alan Chadwick; the pioneer of the North American organic movement. Large, crack resistant 1-1 1/2" cherry tomatoes have a rich balanced flavor that hold well on clusters throughout the season. Vines are vigorous, 6-8' and disease resistant.

 1 oz./\$8.95 • 1/4 lb./\$24.00
 1 lb./\$70.00 • 5 lb./\$299.00

Seedless Type

300 seeds/oz.; 8 days, 85°F. Seedless varieties are triploid. They should be started in the greenhouse and transplanted when soil temperature in the field are 65°F. Seedless watermelons need a pollinator variety planted with them.

Seedless watermelons require special attention. They must be started indoors. Start at the same time as your pollinator variety (packet of sugar baby gratis with your order).

Use very well drained seed starting mix kept at a steady soil temperature of 85°F. Sow seedless watermelons 3 weeks before outside soil reaches 65°F. Seedlings cannot be transplanted until they have 2-3 sets of leaves and their roots have filled the soil in the pot.

Triple Play F1 Hybrid

NEW

(7-10 lbs.) Round Seedless Triploid with deep red flesh surrounded by a light green rind with narrow stripes. Very early 'refrigerator' sized. 85 days.

1 Thermostat/\$49.00

Hydrofarm Heat Mats

Put that Sunny Sill to Work!

Using a heat mat is a must for greater seed germination and jump-starting your season. It is the perfect size for small growing spaces, and improves germination by warming the root area 10-20°F over ambient temperature. By warming the roots, you increase your growing success, as this mat will maintain a controlled temperature all season long.

**Black Mint/
Huacatay**

(*Tagetes minuta*)

Half hardy annual. 36,000 seed/oz. Pre-chill one week in refrigerator then germ @ 65-68°F. (6") This is an internationally beloved herb as well as a key ingredient in the ethereal Peruvian aji verde sauce. It is also the source of the essential oil marketed as "marigold oil". It can best be described as a flavor combination of basil, mint and citrus. Hanging bundles of the dried stems can repel insects from your house. The roots will kill some perennial weeds.

40067 (price by weight)

Coriander/Cilantro

(*Coriandrum sativum*)

Hardy, reseeding annual. 3,000 seeds/oz. 10-14 days. 50°F Needs darkness to germinate.

(18"-24") Called Coriander when harvested for the seed and Cilantro or Chinese Parsley when harvested for its leaves. Direct seed in sunny area, transplants bolt quickly. Seed every two weeks for leaves.

Santo

Slower to first leaf harvest than slow bolting but takes cut and come harvesting. Leaves are darker green and the plants are sturdier than slow bolting. The leaves are extremely aromatic and it can grow in greenhouses. The plants are tolerant of cooler conditions. 60 days leaves, 90-105 days seeds.

40115 (price by weight)

40190 (price by weight)

1 oz./\$4.95 • 1/4 lb./\$6.95
1 lb./\$16.00 • 5 lb./\$59.00

Fennel

(*Foeniculum vulgare*)

Annual. 5,000 seeds/oz. 10-14 days. 65°F. Need darkness to germinate. 90-110 days mature, 15-20 days microgreen.

Grown for its white bulbs that can be eaten raw or cooked. Most reliable when grown in warm (not hot) and sunny weather with weekly watering. Direct seed to avoid transplant shock. Leaves are a food source for the Black Swallowtail Butterfly caterpillar. This wild-type variety has a white, flattened bulb.

Bronze Fennel

(*Foeniculum vulgare 'Purpureum'*)

A deep bronze perennial version with aromatic feathery foliage and yellow umbel flowers. Will form a 5' tall clump by the third year. Does not form any type of bulb but does produce an abundance of seed. All parts are edible. Wonderful accent for the pollinator garden. Host plant for the Black Swallowtail butterfly caterpillar. Plant this and they will come.

Lavender

(*L. angustifolia*)

Perennial. Pre-chill one week in refrigerator, then germinate at 70°F, 20-28 days.
29,000 seeds/oz.

Our lavenders are the hardiest and most fragrant varieties available from seed. The plants bloom in early summer and if pruned lightly after flowering may rebloom in late summer. Grow in full sun in a location with well drained soil. Lavender can survive cold winters as long as there isn't standing water over the winter. Amend acidic soils with lime. Until they are mature lavender plants need to be watered weekly in dry weather. For dried flowers harvest before they open fully and store in a cool, dry place. Unless otherwise noted our lavender varieties are hardy from Zones 5-9. Edible, fragrant flowers.

True

(24-28") This true lavender has green leaves and dark-lilac flowers. The plants are rounded and bushy at maturity.

40340 (price by weight)

How We Ship Your Seeds

Most of our seeds, with the exception of our retail packets, are sent to you in moisture resistant re-closable bags. Each bag is sized for the amount of seed inside and can keep the seed safe year after year with proper storage.

By using these durable bags, we are helping to ensure seeds stay at their peak longer and make things easier for you, the grower.

Thyme

Perennial.
100,000 seeds/oz. Zones 5-9.
21-28 days. 60-70°F
Needs full sun and well drained soil.
Mulch plants in winter.

Broad Leaf/Winter

(*T. vulgaris*)

(8-12") The plants have tiny, oval, dark green leaves with a robust flavor. The plants are bushy and well branched.

Wowzers! Catgrass

Sow seed on the surface of soil or lightly covered by soil. Seed takes 14 days to germinate at 60-80°F (soil temperature).

Crested Wheatgrass

(*Agropyron cristatum*)

Grow in a flower pot or window box planter and let your cat play! Cats will love it! This is a fine grass that is more durable and longer lived than thick cat grasses.

40365 (price by weight)
Retail pack (12 g)/\$1.99 • 1/4 lb./\$7.95

Alyssum, Annual

(*Lobularia maritima*)

Annual.
80,000 seeds/oz.; 8-10 days, 78-82°F.
Needs light to germinate. Water only with warm water. Susceptible to damp-off. Great for containers and baskets. Sow after danger of frost has passed.

New Carpet of Snow

(3-5") Dainty and fragrant pure white flowers. Excellent spreading habit for borders and beds.

10120 (price by weight)

Amaranth

Please visit our website:
www.neseed.com

Asclepias

Perennial. Zones 3-9
4,000 seeds/oz.. 21-28 days, 70-75°F
Germinating seeds indoors can be challenging. Check out our web site for tips for success. Asclepias do not transplant well. Plant in full sun to partial shade. Mature plants are drought tolerant and can also take occasional flooding. Food source for Monarch butterfly caterpillars.

Common Milkweed

(*A. syriaca*)

(2-3') This milkweed has lavender to pink flowers from late spring through mid-summer. They are beautifully fragrant. The plants will spread and fill in where there is bare soil.

20315 (price by weight)
1/16 oz./\$6.95 • 1/4 oz./\$15.00
1 oz./\$39.00 • 1/4 lb./\$129.00

Butterfly Milkweed

(*A. tuberosa*)

(1-3') This milkweed has orange to yellow flowers from early summer through early fall.

1/16 oz./\$6.95 • 1/4 oz./\$14.95
1/2 oz./\$22.95 • 1 oz./\$34.95
1/4 lb./\$119.00

Aster

(*Callistephus chinensis*)

EZ from Seed.
Annual.
12,000/oz. 8-10 days 70°F.
Seeds need light to germinate.

Pinocchio Dwarf Mix

(6-10") Compact mounded plants produce an abundance of 1.5" double flowers in an array of colors. Blooms summer through late fall.

#10225 (price by weight)
1/8 oz./\$6.95 • 1/2 oz./\$19.00
1 oz./\$26.00 • 1/4 lb./\$79.00
1 lb./\$259.00

Bachelor Buttons

(*Centaurea cyanus* or *Cornflower*)

EZ from Seed.
Annual.
6,000 seeds/oz.; 7-14 days, 65°F.
Cover seeds as darkness aids germination. 90 days from seeding to bloom. Full sun in well drained soil. Drought tolerant.

Polka Dot Mix

(16") This is a mix of many shades of blue, pink, plum, white and lavender flowers. It is one of the easiest flowers to grow from seed. The flowers are edible and have many uses including being a source of natural food dye.

10395 (price by weight)
Retail pack/\$1.99 • 1/2 oz./\$3.95
1 oz./\$5.95 • 1/4 lb./\$16.95

Blue Lace Flower

(*Didiscus caeruleus*)

EZ from Seed.
Annual.
(24-30") 15-20 days, 70°,
10,000 seeds/oz.

Baby blue to nearly purple shades of 2-3" sweetly fragrant umbels of star shaped flowers sit atop individual stems. Blooms late-summer until frost. Full sun. Does not transplant well.

10410 (price by weight)
1/8 oz./\$7.95 • 1/2 oz./\$19.00
1 oz./\$26.00 • 1/4 lb./\$79.00
1 lb./\$279.00

Cabbage/Kale, Ornamental Flowering

Annual.
7,000 seeds/oz.; 7-14 days, 68°F
Plants need temperatures below 60°F to color up. Seed 3 months before first fall frosts.

Coral Prince

(8-12") Coral Prince F1 Hybrid flowering kale features green outer leaves with a creamy white center and a rose heart. This vigorous flowering kale has sturdy stems and very large heads when well grown. The leaves are so deeply notched they look feathery.

13871 (price seed count)
100/\$9.95 • 500/\$22.00
1,000/\$35.00

Popular edible flowers: Borage, Calendula, Chives, Fennel, Gem Marigolds, Nasturtium, Squash blossoms, Sunflower petals, Violas.

Pigeon Series F1 Hyb

(6-10") Compact plants with rounded smooth leaves and solid heads.

10912 Pigeon Purple

Green outer leaves with a magenta purple center.

10910 Pigeon Red

Green outer leaves and a dark red center.

10911 Pigeon Victoria

Green outer leaves and a pale pink center.

10913 Pigeon White

Green outer leaves and a creamy white center.

Cut Flower Types

Visit www.neseed.com for Crane Series and Sun Series Cutting Type Flowering Cabbage.

Calendula

EZ from Seed.

Annual.

3,000 seeds/oz.; 10-14 days, 70°F. Needs darkness to germinate. Best sown October/November for spring blooms.

Pacific Beauty Mix

(24") Heat resistant variety with long, straight stems and extra-large 4" blooms. A mix of orange, yellow, apricot and cream for cutting. Likes full sun and cooler spring weather. Edible flowers.

10950 (price by weight)

Retail pack/\$1.99 • 1/2 oz./\$4.95
1 oz./\$6.95 • 1/4 lb./\$14.00
1 lb./\$39.00 • 5 lb./\$149.00

Cardinal Climber

(*Ipomoea quamoclit*)

EZ from Seed.

Annual. Zones 6-10.

1,000 seeds/oz.; 5-10 days, 68-86°F
Plant in full sun in any soil; for best results in moist but rich garden soil.

(8-10") This vine has many small red tubular flowers. The blossoms are star shaped and contrast nicely with its dark green, deeply divided leaves. It does not like cold weather and can be started early indoors but should be transplanted carefully. Like its relative the morning glory, it is easy to grow. Gardeners in warm climates should expect it to get up to 30' tall and self seed freely.

13855 (price by weight)

Retail pack/\$1.79
1/4 oz./\$5.95 • 1/2 oz./\$8.00
1 oz./\$12.00 • 1/4 lb./\$40.00

Carnation

Please visit our website:
www.neseed.com

Celosia

Annual. 34,000 seeds/oz.; 8-10 days, 75°F. Light aids germination. Keep moist as seed is very sensitive to drying out. Flower heads are extremely long lasting. Effective for borders, mass plantings, cutting and drying.

Crested Type

Cockscomb Mix

(12") Huge flower heads in shades of yellow, pink and red are produced on sturdy plants with bright green foliage.

Wildflower Mixes

Wildflower plantings are increasingly popular for their beauty and as wildlife habitat. Consider replacing some lawn or underutilized gardens with a wildflower planting. Varieties included in mixes are subject to change depending upon availability.

All our wildflower mixes are pure seed, no fillers here!

Pollinator Mixes

Over one third of the food we eat is pollinated by bees. There are over 4,000 species of native bees in the United States. When planting a pollinator preserve try to avoid using herbicides and pesticides. Inter-planting native grasses with our pollinator mixes provides a more diverse habitat.

Bee Feed Mix

This blend of widely adaptable, annual and perennial flowers provides nectar and pollen to wild bees, honey bees and other pollinators. Contains early, mid, and late blooming flowers to provide bee forage all season long. Flowers are suitable for short-tongued and long-tongued bees and come in a wide range of colors for an attractive display. Contains: *Baby Blue Eyes, Bergamot, Blue Flax, California Poppy, China Aster, Chinese Forget-Me-Not, Corn Poppy, Fleabane Daisy, Globe Gilia, Indian Blanket, Lance-Leaved Coreopsis, New England Aster, Plains Coreopsis, Purple Coneflower, Purple Giant Hyssop, Siberian Wallflower, Sweet Alyssum, Tidy Tips.*

Planting rate = 7-14 lbs./acre, 5 oz./1,000 sq. ft.

21310 (price by weight)
Retail pack/\$2.49 • 1 oz./\$9.95
1/4 lb./\$25.00 • 1 lb./\$65.00
5 lb./\$239.00

Honeybee Flower Mix

A blend of adaptable, annual and perennial flowers that provide nectar and pollen to honey bees all season long. Contains: *Blanketflower, California Poppy, Cape Forget-Me-Not, China Aster, Chinese Forget-Me-Not, Corn Poppy, French Marigold, Lacy Phacelia, Lance-Leaved Coreopsis, New England Aster, Prairie Coneflower, Purple Giant Hyssop, Purple Prairie Clover, Rocky Mountain Penstemon, Scarlet Cinquefoil, Siberian Wallflower, Sulphur Cosmos, Sweet Basil, Sweet Mignonette and White Upland Aster*

Planting rate = 5-10 lbs./acre, 4 oz./1,000 sq. ft.

Look to the Herbs for more beneficial pollinators like Borage, Cilantro, Fennel, Dill, Oregano and Sage.

5 lb./\$259.00

Monarch Butterfly Mix

Monarch populations have been in decline for a number of years, and the loss of nectar sources and milkweeds has been indicated as a major contributor to these declines. By encouraging home owners and businesses to create stunning Monarch habitats, we are hoping to reverse this trend. This mix of native and garden flowers provides nectar for adult Monarch butterflies and food for their caterpillars.

Contains: *Annual Candytuft, Butterfly Milkweed, Dwarf Cosmos, Gayfeather, Hoary Vervain, Indian Blanket, Marigold 'Naughty Marietta', Mexican Sunflower, Purple Coneflower, Rocket Larkspur, Siberian Wallflower, Smooth Aster, Sulphur Cosmos, Zinnia.*

Planting rate = 12-24 lbs./acre, 1/2 lb./1,000 sq. ft.

CowPots

The pots you plant!

The best pots for starting your plants!

A CowPot is an exciting high-performing alternative to plastic and peat pots. These earth-friendly "pots you plant" are made with biodegradable, 100% renewable resource composted cow manure, unlike peat which is mined from bog eco-systems or plastic which is derived from finite fossil sources.

- Planted pots biodegrade fast
- Roots easily penetrate CowPots
- Healthier roots = stronger plants
- Enriches garden soil, naturally!

The special manufacturing process removes all of the weeds, pathogens and odor from the manure. All that's left is the natural fiber and goodness of manure: the perfect plantable pot!

Hydrofarm Heat Mats

Put that Sunny Sill to Work!

Using a heat mat is a must for greater seed germination and jump-starting your season. It is the perfect size for small growing spaces, and improves germination by warming the root area 10-20°F over ambient temperature. By warming the roots, you increase your growing success, as this mat will maintain a controlled temperature all season long.

TERMS AND CONDITIONS

Payment Terms

Full payment is due with each order. Discover, Visa, Mastercard and American Express are accepted for mail, phone and neseed.com orders. PayPal is also accepted for neseed.com orders. We will accept checks or money orders by mail via the mail order form found in our hard copy catalog. No cash or stamps through the mail will be accepted. When ordering by mail, please complete the order blank and include check/M.O. payment or if ordering by credit card, complete the card number, expiration date and card holder signature sections. Returned checks will carry a \$30.00 service fee. All past due invoices must be paid prior to shipping any orders. Items will not ship until payment is received. For credit accounts or other methods of payment please call our office at (800) 825-5477.

Credit Accounts

We offer open accounts to Federal, State, County and Municipal agencies. All others must have a valid Discover, Visa, Mastercard, or American Express account to secure their account. For information on opening a credit account, call our Customer Service representative at (800) 825-5477 or write to NESEED, Credit Dept., 122 Park Ave, Building H, East Hartford, CT 06108. Applications for credit require 3 trade references, take 2-3 weeks for processing and must include telephone numbers and addresses of references. Credit accounts left inactive for over 2 years will require a new credit application.

Credit Payment Terms (Credit Accounts)

Invoices for credit account purchases are due and payable within 30 days of the invoice date. Invoices not paid within 45 days are automatically assessed the legally permissible maximum finance charge of 18% APR (1.5% per month) and every 30 days thereafter. Credit accounts must be opened with Visa, Discover, Mastercard, or American Express numbers and will be automatically charged to your credit card after 60 days plus accrued interest. Accounts not paid after 120 days are canceled and referred to our collection agency. You agree to pay NESEED all collection costs including but not limited to reasonable attorney's fees.

Prices

All prices in our hard copy catalog and neseed.com are subject to change without notice; but we will not change our price unless absolutely necessary. Orders will be invoiced at the price prevailing at the time of shipment. Although every effort is made to keep pricing as accurate as possible, NESEED will not be responsible for pricing errors. NESEED is not responsible for honoring third party pricing, discount claims, terms and conditions or offers. Such third parties include, but are not limited to, coupon websites, social media posts, blogs, resellers and other avenues beyond our control.

Back Order Policy

All items will be back-ordered unless the item is sold out or a crop failure. Unless the customer notifies NESEED in writing, all back-orders shall be shipped. If payment is over the amount which is filled, the difference will be credited to you and applied toward your next purchase. Credits left on accounts for over 1 year will be deleted. Items MAY NOT be added to any back-order.

COD Shipment

NESEED does not ship COD.

Delivery

Please allow 7-10 business days for delivery. Shipping and handling for all seed orders \$175.00 and above are free of charge in the continental United States (seeds only, hardgoods excluded). All seed orders under \$175.00 are subject to a shipping and handling charge in the continental United States. We normally ship by first class priority mail or UPS at our discretion. By choosing a shipping method other than free or flat-rate (e.g. UPS, FedEx, etc.), the customer agrees to decline flat-rate and free shipping methods and abide by the pricing and shipping method chosen. Items that need to be delivered sooner (such as overnight) or items that will be shipped outside the continental United States will require additional charges.

International Sales (Outside Continental United States)

Due to varying postal rates and customs regulations, special rates and billing will be applied to all orders. All international shipping is at customer's risk. A Phytosanitary certificate is required and must be obtained by NESEED before items can be shipped. For NESEED to obtain this certificate, the customer must first purchase the certificate on neseed.com for a nominal fee. Items will not ship unless this Phytosanitary certificate is obtained.

Return of Merchandise

NESEED will not accept the return of any opened seed packages or goods. Proper authorization and shipping instructions are required before returns are accepted. Unauthorized returns will be refused and sent back at the customer's expense. No returns will be accepted after 30 days from time of invoicing. A 25% restocking fee will be charged on all returns. All returns must have proper authorization code on package before return is valid. All special orders can not be returned and will not be accepted. No refunds on postage.

Claims

We are not responsible for damage after delivery to the carrier. All claims for storage and damage must be reported to NESEED by calling (800) 825-5477 immediately. Customers will then receive further directions on the claim from NESEED.

Delays in Delivery

Seller shall not be responsible for any loss or damage caused by delays in delivery from weather, strikes, acts of war, fire, casualty, inability to obtain materials or other causes beyond our control.

Recommendations

All recommendations made by us are compiled from recognized horticultural sources. We are not responsible for damage or failure because of any recommendations given by NESEED Co. personnel.

Descriptions and Illustrations

The descriptions of plants in our catalog and website have been prepared from our trial observations, reports from suppliers and other trial or experimental situations. Illustrated specimens have been grown and photographed under favorable conditions. Though they describe what has been observed and documented, they do not necessarily predict what can be expected under all circumstances. Variation from the color shown in our hard copy catalog or website can be expected as a result of screen viewing device and color profiles, film, printing ink, camera color balance, daylight color temperature and other catalog production techniques as well as soil, climate and other growing conditions. NESEED will not be held responsible for pricing, typographical, description or illustration differences or errors.

Business Hours

We are open for business Monday through Friday from 8:00 a.m. until 5:00 p.m. EST. Orders can be placed in our online store 24/7. Orders are shipped during business hours.

To Place Your Order

Call toll free: (800) 825-5477 or fax your mail order to: (877) 229-8487.

Order online 24/7 at www.neseed.com.

For order status or inquiries call: (800) 825-5477.

Warranty and Limitation of Liability

In lieu of all other warranties, expressed or implied (included any implied warranty or merchantability or fitness for a particular purpose) and all other obligations or liabilities, we warrant to the extent of the purchase price that the seeds we sell are as described by us on our container, within recognized tolerances. Liability, whether contractual, for negligence or otherwise, is limited in amount to the purchase price of the seeds under all circumstances and regardless of the nature, cause or extent of the loss and as a condition to any liability on our part. We must receive notice by registered mail for any claim that the seeds are defective within 10 days after the defect of the seeds become apparent. Seeds not accepted under these terms and conditions must be returned at once in their original unopened containers within 10 days and the purchase price will be refunded. Notwithstanding the above, all claims shall be submitted within 90 days of invoice date. All claims shall be submitted with original NESEED Packaging.

Terms and Conditions Through Other Service Providers

Terms and conditions for NESEED orders placed through services such as Amazon may be partially governed by their own terms and conditions and, in some instances may supercede our terms and conditions. NESEED reserves the right to modify pricing, payment, shipping and delivery policies when using these services.

RELEASE OF NESEED FROM ANY LIABILITY FOR WATERMELON FRUIT BLOTCH, GUMMY STEM BLIGHT AND OTHER DISEASES

I/We, the buyer(s), do hereby acknowledge and recognize that Watermelon Fruit Blotch and Gummy Stem Blight are risks of watermelon cultivation, whether for commercial or personal use. I/We, the buyer(s), do hereby acknowledge and recognize that there are many potential sources of Watermelon Fruit Blotch bacteria, Gummy Stem Blight and other diseases.

In purchasing seeds from NESEED™, I/We, the buyer(s), do hereby recognize that despite NESEED’s quality control procedures, there is always a small possibility that some of the hybrid watermelon seeds sold by NESEED may have been, at some point, unbeknownst to NESEED, exposed to and infected with Watermelon Fruit Blotch, Gummy Stem Blight or other diseases. I understand that NESEED does not intend to sell watermelon or any other seed, if NESEED is going to be held responsible for any damages, actual or consequential, that may be caused by any disease causing organism, introduced from whatever source, into any crop I/We, the buyer(s), may cultivate at any time. I/We the buyer(s), am/are willing to purchase watermelon seed from NESEED on that basis, and am/are willing to take the risk and the full responsibility for any damages to my/our crop from Watermelon Fruit Blotch, Gummy Stem Blight or any other diseases.

Accordingly, on behalf of the company/operation which I represent and with the authority which has been vested in me by that company/operation, I HEREBY RELEASE NESEED™ FROM ANY AND ALL LIABILITY FOR WATERMELON FRUIT BLOTCH, GUMMY STEM BLIGHT AND OTHER DISEASES, UNDER ANY AND ALL LEGAL THEORIES AND SYSTEMS. I/We, the buyer(s), further agree that this Release applies to the 2024–2025 growing season and any subsequent growing season in which I use NESEED watermelon seeds. I/We, the buyer(s), understand that this Release means that I/We, the buyer(s), have by purchasing watermelon seeds from NESEED, fully and completely waived any right to bring suit against NESEED for any Watermelon Fruit Blotch or Gummy Stem Blight damages, and that I/We, the buyer(s), further waive all rights to recover any damages of any kind from NESEED relating to Watermelon Fruit Blotch disease, Gummy Stem Blight or any other diseases.

In addition, if I/We, the buyer(s), resell NESEED watermelon seeds or seedlings from such seeds, I will require the buyer to agree in writing to the same terms set forth in this release. I/We, the buyer(s), agree to indemnify and hold harmless, NESEED and its supplier or dealers, from any and all claims relating to Watermelon Fruit Blotch, Gummy Stem Blight or any other disease by any party who obtains through my/our company/operation, any NESEED seeds or seedlings.

I/We, the buyer(s) do hereby grant that I/We, the buyer(s), have the authority to enter into this binding agreement, that I/We, the buyer(s), have read and understand this Release, and that I/We, the buyer(s), agree to fully comply with the terms set forth herein.

Dated: ____/____/____ Signed: _____ Customer No. _____

Note: Watermelon Release form must be signed before watermelon seed orders can be shipped.

Planting Chart

Type of Seed	Approx Seeds/Oz	Approx. Days to Germination	Planting Depth	To Direct Seed		Planting Distance
