

AVITHOR
BIRD AWAY™
 VISUAL & OLFACATORY BIRD REPELLENT

BIRD AWAY is quick and easy to install. It is suitable for indoor or outdoor use and causes no damage to buildings or structures. It is formulated to be durable, even in the most exposed locations and is not adversely affected by wind, rain, snow or extremes of temperature.

If left undisturbed, BIRD AWAY's deterrent effect on birds is long-lasting. It will remain effective for up to two years or more after proper installation.

BIRD AWAY works by affecting and altering a bird's behaviour, not by acting as a physical barrier. Birds will completely abandon a habitat, even one they have been using for years, once BIRD AWAY has been applied.

UNDENIABLY EFFECTIVE

A series of trials were undertaken to study the effectiveness of AVITHOR BIRD AWAY Visual & Olfactory Bird Repellent on a range of common bird species. All trials showed 100% effectiveness in repelling these species from commercial and residential properties, in areas where they had been creating a serious nuisance for a number of years.

Trials included an untreated 'control' site to gauge the effectiveness of AVITHOR BIRD AWAY in repelling the birds. In contrast to the trial sites, the control sites remained significantly affected by birds.

In each case, following placement of AVITHOR BIRD AWAY Dishes at the protected sites, birds were immediately deterred from returning and roosting. The sites remain free of all birds. In contrast the control sites remain covered in large numbers of birds.

AVITHOR BIRD AWAY™ is non-toxic and non-harmful to birds. Using our unique 'Flame Shield' formulation, it combines potent visual and olfactory effects to deter pest birds from landing on the structure. A significant benefit is the fact that the birds do not make any contact with the product.

HOW IT WORKS

AVITHOR BIRD AWAY works on the birds three main senses:

SIGHT

AVITHOR BIRD AWAY uses our Flame Shield Gel Technology™ to reflect light (sparkles) in the UV-spectrum. Since birds see light in the UV-spectrum, the sparkle resembles flames. This virtual 'flame shield' visually deters the birds from landing.

SMELL

Contains herbal extracts in a natural product base. If the bird gets closer, it is repelled by the herbal odour.

SOUND

The bird will then sound a warning signal to other birds which provides additional auditory repellence.

A highly effective repellent for:

SEAGULLS

MYNAHS

PIGEONS

SPARROWS

BARN SWALLOWS

STARLINGS

AND MORE

AVITHOR BIRD AWAY™

VISUAL & OLFACATORY BIRD REPELLENT

- Non-toxic visual & olfactory gel to deter pest bird species
- Effective for all pressure sites
- Low profile solution
- 250 g tubes with 15 UV stabilised Dishes
- Dish accommodates gutter clips, window clips and magnets
- BIRD AWAY does not contain polybutene
- Formulated with all ingredients meeting European Pharmacopoeia Standards

DISCREET AND EFFECTIVE

Low-profile application Dishes can be easily fixed in place with silicone, or attached to gutters and windows with magnets or clips.

Even when these Dishes are placed behind the leading edge of a parapet or ledge, they are still effective. Dishes are also invisible from ground level, thus preserving the aesthetic appearance of the building.
