Toxin-free control of all your household pests.

AQUACELL WORKS LIKE A SPIDER WEB TO ENCASE AND IMMOBILISE INSECTS

Stops insects in their tracks!

Specially formulated for use by people who care about the environment.

Mineral SNAIL AND SLUG KILLER

With Elemental Iron

ACO CERTIFIED **BIOACTIVATED BY THE SNAILS:** Protect-us Mineral Snail and Slug Killer is only activated once it is inside the snail's digestive system where the snail's gastric juices solubilise the mineral iron. Once solubilised, the mineral iron forms a soluble iron salt complex that interferes with oxygen uptake by haemocyanin, the respiratory pigment of the snail's haemolymph (blood). This causes the snails and slugs to stop feeding and leads to their death. This makes the product low risk for non-target species including pets and native wildlife.

Independent Australian trials showed the product outperformed traditional chemical-based snail baits, confirming it as an effective, high performance product for use by farmers who require an organic input product and who care about the environment.

➤ Designed to blend in with the environment.

➤ Ready to use pelleted bait optimised for Australian snails and slugs.

➤ **ENVIRONMENT FRIENDLY:** Breaks down to natural nutrients for soils and plants.

➤ Safe for use in areas with animals, birds and other fauna.

NATURAL MINERAL SNAIL & SLUG KILLER

With Elemental Iron

The Only Certified Organic Input to kill Snail and Slugs

A unique component of Natural Mineral Snail and Slug Killer is elemental iron, which is a more effective natural alternative to toxic chemical baits such as metaldehyde and methiocarb, with the product displaying similar or better levels of control and protection.

In fact, all the ingredients are currently used in either foods for human consumption, pharmaceuticals or cosmetics for human applications.

The low pH in the snail's gut activates the product and causes the snails and slugs to stop feeding, leading to the death of the molluscs.

BIRD AWAY™

Visual & Olfactory Bird Repellent

A totally new concept in the effective management of pest bird species.

100% natural and pesticide free, BIRD AWAY is discreet, non-harmful and effective at repelling birds from buildings and other structures.

Flame Shield Gel Technology™ reflects light as a sparkle in the UV-A light spectrum. Birds see the sparkle as flames. This virtual 'flame shield' visually deters the birds from landing.

If the bird gets close, it is repelled by the strong herbal odour.

It works purely by visual and olfactory cues. The gel is supplied ready-to-use in pre-filled, low-profile dishes for easy placement. It does not kill or trap birds.

BIRD AWAY works indoors or outside; and has been tested successfully against pigeons, common mynahs, starlings, sparrows, swallows, willie wagtails, gulls, crows and corellas; with birds deterred for up to two years or more.

HOPSTOP® CANE TOAD KILLER

Recommended by the RSPCA

HOPSTOP® is a patented Australian innovation that provides for the humane kill of cane toads.

HOPSTOP is an aerosol spray that is sprayed directly onto toads without any need to touch the animals. It anaesthetises toads within seconds, and kills them humanely in 30-60 minutes.

HOPSTOP is referenced by the RSPCA Knowledge Base as an accepted method of killing cane toads and recommended by the

Queensland Schools Animal Ethics Committee for euthanasing toads.

HOPSTOP won the Australasian Aerosol Industry Association's 'Innovation Award' and 'Best New Product' award.

AQUACELL® INSECT GUN

Rapid Knockdown - KILLS Crawling & Flying Insects

AQUACELL INSECT GUN offers a unique toxin-free pest control solution employing a purely physical mode of action to encase and quickly immobilise a wide range of insects and arachnids (spiders and scorpions) from cockroaches to bed bugs and house flies to mosquitoes.

It's a NATURALLY DERIVED product with a PLANT BASED ACTIVE INGREDIENT in a water-based spray that acts like a spider's web to encase and immobilise insects, killing them dead in their tracks.

- Toxin-free
- Every ingredient food-grade
- Active derived from pine trees grown in sustainable forests
- Rapidly immobilises & kills pest insects
- Works like a sprayable spider's web
- Kills insects resistant to traditional insecticides
- Water-based spray
- Ready-to-use
- Approved organic input

Mice, Rats

REALLY SERIOUS! PRO® VERMAX DUAL ACTIVE RODENTICIDE

Two Actives to Kill Rodents Faster

REALLY SERIOUS! PRO® VERMAX DUAL ACTIVE RODENTICIDE is the first ever dual active rodenticide.

This patented technology combines two actives together with our unique FLUO-NP Technology™ to create a rodenticide that outperforms any other product in the market in terms of speed of kill and reduced risk to pets. VERMAX features improved palatability for better results.

The two actives combine to create a synergistic effect, with each dynamically intensifying the effects of the other. This creates a more potent solution than either alone, yet at the same time achieving reduced risk to people and pets.

REALLY SERIOUS! PRO VERMAX DUAL ACTIVE RODENTICIDE is the first bait in Australia to incorporate FLUO-NP Technology. This stands for Fluorescent – No Phobia Technology.

This unique concept decreases the normal neophobia (fear of new things) shown by pest rodents to ensure the rodents feed more quickly on the VERMAX.

REALLY SERIOUS! PRO® ADVANCED LIPO-GEL RODENTICIDE

One Feed Kills Rats and Mice

For effective control of rats and mice around industrial, commercial, agricultural and residential buildings.

REALLY SERIOUS! PRO® ADVANCED LIPO-GEL Rodenticide brings a new concept to the rodenticide market, with the pioneering LipoGel Technology™. This technology allows the blending of various vegetable fats and proteins, enriched with cereals and sugars, with specially derived Lurent Aromatics™. This creates a soft creamy bait which retains high qualities of long term stability, attraction, moisture retentions and very high palatability.

Rats love REALLY SERIOUS! PRO ADVANCED LIPO-GEL, which is

prepared to the exacting Australian specifications using the finest food ingredients. The gel is formulated to ensure high adhesion to any type of surface, so it stays in stations and is not taken out by rodents, which often occurs with block baits or soft bait sachets.

REALLY SERIOUS! PRO® FLY-TRAP GRANULES

Natural Fly Attractant Granules for Use with the REALLY SERIOUS! PRO FLY-TRAP

100% natural food-based formulation.

This is ideal for use around livestock, domestic, commercial, public and industrial buildings, facilities and structures.

It represents an ideal solution for both zootechnical (e.g. stables, animal shelters in general) and civil environments (e.g. food industries, camping sites, landfills, farms, holiday resorts, etc.).

REALLY SERIOUS! PRO® FLY-TRAP water-soluble sachets dissolve in the water in the REALLY SERIOUS! PRO FLY-TRAP to attract most common species of nuisance flies including house flies (*Musca domestica*), flesh flies (*Sarcophaga* spp), blow flies (Calliphoridae family), lesser house flies (*Fannia canicularis*) and horse flies (Tabanidae family).

Natural food lure

REALLY SERIOUS! PRO® FLY-TRAP

Flies Caught in the Trap are Unable to Escape and Die

The Trap uses a pesticide-free 100% natural approach to fly control, employing a unique and highly attractive 100% food-based lure to draw the flies into the proprietary

REALLY SERIOUS! PRO® FLY-TRAP, from which there is no escape. Now flies can be controlled in any outdoor area, whether it's a home or farm, an area with livestock, resorts, holiday parks or food handling establishment and more.

The Trap contains our unique Unidirectional Cones. These Cones allow the flies to easily enter. Since they cannot escape this quickly

becomes the flies' final resting place. It is amazing how many flies the trap will catch.

The Traps need to be emptied and refilled with clean water and fresh sachets of REALLY SERIOUS! PRO FLY-TRAP GRANULES every 30-60 days, depending upon the fly pressure and the environmental conditions.

FUMITHOR™ DELTA

Insecticide Smoke Generator

FUMITHOR DELTA uses smoke to reach inaccessible areas and penetrate deep into the tiniest cracks and crevices where the pests hide.

With particle sizes down to just 1 micron, the smoke can penetrate into places that are simply not reached by other products.

The active constituent, deltamethrin, is deposited on vertical, horizontal and the underside of surfaces, ensuring the most thorough

treatment possible. There is nowhere for pests to hide from FUMITHOR DELTA!

This is the revolutionary new way of eliminating a wide range of pests and it utilises Dynamic Smoke Dispersion Technology™.

FUMITHOR™ HYGIENE

A New Concept for Improved Sterilisation

Widely used in poultry sheds.

FUMITHOR HYGIENE provides a highly effective and unique method for improved disinfecting. FUMITHOR HYGIENE uses a thermal smoke and requires no specialised equipment. To achieve a thorough sterilisation, all you need to do is light the wick - that's it!

FUMITHOR HYGIENE smoke travels easily through the air, providing a superior level of disinfection since it effectively treats every surface in the room, even hard to reach areas e.g. ceilings, under benches, deep into cracks and crevices, etc. This level of treatment simply cannot be achieved via conventional methods.

Using FUMITHOR HYGIENE could not be easier, the Quick-light Wick™ guarantees release of the smoke first

time, every time. After conducting standard cleaning measures, close the building or room to be treated and seal all areas the smoke could escape through.

Turn off air-conditioners and smoke alarms; place the FUMITHOR HYGIENE can on a non-flammable ground surface and light.

The active ingredients in FUMITHOR HYGIENE effectively kills all bacteria present.

The areas where FUMITHOR HYGIENE can be used are virtually endless, including hospitals, surgeries, public use facilities, toilets, shipping containers, food storage facilities, cold stores, veterinary facilities, stables, poultry farms and more.

NO MORE SOLDER™

Termite-proof Sealant for Ant Caps & More

NO MORE SOLDER Termite Proof Silicone is a versatile, high performance, neutral cure construction silicone sealant.

Specifically formulated as an adhesive and sealant for termite proofing during construction, NO MORE SOLDER is suitable for use indoors, outdoors or in confined spaces.

The termite proofing properties of NO MORE SOLDER make it perfect for use with ant caps or termite shielding on stumps and piers. Other pre-construction applications include: control joints and expansion joints or crevices in the slab and for joining ant-capping or flashing. Rigorous testing by the CSIRO confirms that termites are simply unable to penetrate NO MORE SOLDER & it meets the National Construction Code and complies with

AS3660 for Termite Management.

Not only can NO MORE SOLDER be used for termite proofing, but because it is sanitary grade, mould resistant and suited for internal use, it also makes an ideal general purpose sealant. It is perfect for wet area applications such as kitchens, bathrooms, laundries and other damp areas.

The bond strength of NO MORE SOLDER has also been tested in compliance with adhesion Standard ASTM C794.
