

Protect-us™

CORAL

RAT & MOUSE BAIT STATION

- ✓ **REUSABLE BAIT STATION WITH PATENTED SECURITY LOCK**
- ✓ **Bait is safely secured in child and pet resistant housing.**
- ✓ **Professional design improves rodent feeding, delivering better results.**

What is included?

1x Coral Station

1x Secure Mounting Bracket for firmly fixing the Coral Station to a wall

1x Plastic Key to lock the Station and unlock the wall mounting

We recommend the use of Protect-Us Rodent Baits with your Coral Bait Station.

Why use a Bait Station?

1. Most importantly, it is child-resistant to protect against children and pets gaining access to the toxic bait.
2. Your Coral Rodent Bait Station is a professional housing that improves rodent feeding and bait uptake by providing rodents with a sense of security. This provides better results.
3. It includes a patented security lock and wall mounting bracket allows you to anchor the Coral Station to a wall to provide even greater safety and security. The only way to remove the Station is with the supplied key.
4. Your bait is secured away from prying hands and can only be accessed by using the supplied key. NB the same key also fits our Eris Mouse Station for your convenience.
5. Rodents will not die in the Coral Station – it is not a trap. It simply provides them with a safe environment in which they can feed, while protecting against your children and pets from gaining access to the bait.

How to Use your Coral Bait Station

1. Place the Station in an area where you have seen evidence of mice or rats.
2. Place Stations so they are out of sight of children and pets. Secure the Station to a wall using the mounting bracket supplied.
3. Add Protect-us Rodent Bait (not included in this pack) to the Station, being sure to secure the bait on the metal rods inside the Station. Always use rubber gloves when working with rodent baits.
4. Use bait in accord with the registered product label.
5. Close the lid and lock the Station using the supplied plastic security key.
6. Check the Station weekly and refill as required.
7. The Station can be cleaned and reused.
