NON-WOVEN WALLCOVERING HANGING INSTRUCTIONS AND CARE

**** DO NOT CUT OR INSTALL UNTIL YOU HAVE READ THESE INSTRUCTIONS! ****

Non-woven wallpapers are paste the wall application.

Please read these instructions carefully before hanging this wallcovering. It is advisable that a professional decorator is used.

Preparation

- Walls should be dry, clean and even.
- Remove any old wallpaper and loose paint.
- Roughen painted surfaces with sandpaper.
- For best results, we recommend that walls are cross lined using a good quality lining paper. Sizing the lining paper will aid adhesion.
- Lining should be allowed to dry out completely before hanging the wallcovering.

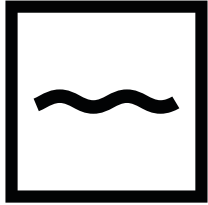

Pasting and Hanging

- This is a paste the wall product. The decorator should paste the wall and not the back of the wallcovering.
- A good quality, solvent free, fungicide protected ready-mixed 'tub' adhesive – specifically for paste the wall non-woven papers should be used.
- Paste should be evenly applied to the wall to hang one length at a time, to an area slightly wider than width of the paper.
- Butt joints and use a decorator's brush to smooth down the wallcovering, working from the centre to the edges to express air bubbles.
- Avoid squeezing paste out of the joints and ensure paste does not get onto the brush or roller.
- No paste should be allowed to come into contact with the surface and hands should be kept clean and dry whilst hanging the wallcovering.
- Paste will damage the surface. The company cannot accept responsibility for marks or damage caused by paste.
- Should any paste have been allowed to come into contact with the surface, it should be lightly sponged whilst still moist, using a clean damp sponge.

Spongeable:

To clean your wallpaper, use a damp but not soaking wet sponge to wipe the surface of the paper very gently. Do not use any cleaning fluids or chemicals, just water.

Suitability in areas of moisture

Whilst our wallpapers are suited to most environments, applications in bathrooms and kitchens may influence your choice of paper. Our standard papers are suitable in most such situations, and application of a wallpaper varnish such as JH Ratcliffe Glaze Coat would further enhance the performance. It is important to test before application as it may affect colours.

This information has been supplied in good faith, but without guarantee. Site conditions are beyond our control. It is the responsibility of the buyer to ensure that the environment is suitable for the wallcovering.

All of us at Dado hope you enjoy your wallcovering
for many years to come!
