Before you start this treatment, read the manufacturer's printed information leaflet from inside your pack. The leaflet will give you more information about mesterolone tablets. Take the tablets exactly as your doctor has told you to. To begin with, it is usual to be prescribed 25 mg (one tablet), to be taken three or four times a day.

Proviron (Mesterolone) (Mesterolone) Proviron represents one of the oldest anabolic androgenic steroids on the market. A product of the giant pharmaceutical company Schering, it would first appear in 1934. Officially known as Mesterolone, it has appeared under numerous brand names over the years, but the Proviron name has continually remained. [description](#)

Mesterolone is so old, in fact, that it shared its inception alongside Methyltestosterone in 1935, and Testosterone Propionate in 1937, which were two of the first anabolic steroids put to use in medicine as well. Of course, Methyltestosterone and Testosterone Propionate are best remembered for all of their glory while Proviron is/was lesser known. Mesterolone is an orally active androgenic steroid (AAS) and a dihydro derivative of testosterone (DHT) that is the male sex hormone. It is a weak androgen and is used in the treatment of hypogonadism in men, which is a condition where the testes are not able to produce enough testosterone. This is also used by bodybuilders to temporarily.

What Is Proviron - Benefits, Dosage and Side Effects of Mesterolone. January 28, 2021. Proviron, also known as Mesterolone, is an orally active compound that has been prescribed to men struggling with

hypogonadism - a condition in which they are unable to produce as much testosterone as they should be.

Plus, Mesterolone (Proviron) is a steroid that does not convert into estrogen so it doesn't aromatize. As mentioned, Proviron comes in forms of tablets so it should be taken by mouth. By purchasing Proviron from Hilma Biocare you can expect a pack containing 50 tablets with 25 mg of Mesterolone as active ingredient per tablet. [on yahoo](#)
