M	3	4	36	3
W	3	5	36	5

Directions :

1. Print this page at 100% scale
2. Check the scale is correct using a ruler against the 'print scale check' below
3. Cut or fold along dotted line
4. Place the template on a flat hard surface with the folded / cut edge against a wall
5. Step on template with heel against the wall
6. Check distance of longest toe against the front of the 'footbed' (drawing a line along the front of your toes works well)

You should be aiming for 5-10mm depending on preference.

Note, this guide represents the insock and the width fitting is a little more generous due to the soft materials used in the upper of the shoe.
