- B Stem with LED light source
- C Lamp base
- D Set screw
- E 4 x Top screws
- F 2 x Screws for base plate
- G Base plate
- H Transformer with interchangeable plugs
- I Hex screwdriver

This product contains a light source in energy class G

## Safety precautions

- Dispose of plastic bag from packaging and do not allow children to play with it.
- Keep product well out of children's reach.
- The lamp is only intended for interior use.
- Consult a professionally qualified electrician if in any doubt.
- Do not place the cable within reach of small children or anywhere there is a risk of falling over it.
- Disconnect the electricity supply at the fuse box, before commencing work.
- If the external cable or cord of this lamp is damaged, it must be replaced by the manufacture or a similar qualified person in order to avoid a hazard.

## Cleaning instructions

- Wipe surface of the glass shade with a soft, damp sponge or cloth, and wipe immediately after with a dry cloth.
- Do not use any abrasive cleaning tools such as steel wool, scouring sponges or stiff brushes.
- Never use strong cleaning agents such as white spirit, turpentine, household glass cleaner or cellulose thinners.
- Only wipe the inside of the shade with a soft, damp cloth or feather duster.

For indoor use only  
6.6W dimmable LED  
(built-in LED, non replaceable)

## Step 1

Place the base vertically and make sure to have enough free space, so the stem can be placed horizontally during assembly to base. Two people are needed for assembly, one to hold the base in position and one to screw in the stem.

## Step 2

Insert the cable from stem into the base, through the hole on the top.

## Step 3

Screw the stem into the base and tighten properly, while keeping a 90 degree angle between stem and base. After the stem is tightened, no thread must be visible.

## Step 4

Once the stem is properly in place, insert and tighten the set screw with the provided hex screwdriver. Use of this lamp without the set screw will void the warranty of the product.

### Step 5

In the bottom of the lamp base, plug the connector from the stem into the connector from the base. The connectors can only be connected to each other in one position. Make sure that they are properly secured to each other.

### Step 6

Screw the base plate into place with the provided screwdriver.

### Step 7

Make sure the lamp is in an upright position. Lower the lamp shade over the stem and align the holes of the shade with the holes in the top cap. Next, insert the top screws, one by one, into the holes in the the lamp shade and screw into the top cap. Do not tighten all the way yet. Once all the top screws are in place you can proceed to tighten the screws. When finished, make sure that they are properly tightened.

### Step 8

Connect the cable to the transformer and insert the relevant plug for your region. Make sure everything is in place before plugging the transformer into an outlet. Adjust the light intensity to desired level by turning the dimmer on the base.
