Shaded satin gold finish chandelier with glasses

Ø 51 cm I 80 cm 18 Kg
9x max 42W E14

The Icicles series

The glass, skillfully fractured, has the dual function of a decorative element and a light diffuser. It rests on simple hammered brass tubes, which form circles, and as soon as these "splits" are illuminated, games of light are created that run endlessly. This simple shape is extremely customizable in size and finishes. Its versatility makes it suitable for any type of furniture. Here it is presented in Shaded Satin Gold Plated, but obviously the finish can be customized.
