

ATOMIC PENDANT | SUSPENSION

Atomic light pendant by DelightFULL is a modern design interpretation of the atomic age, inspired by the composition of the atom. Building this unique lighting design using materials such as brass, steel and aluminum, DelightFULL's skilled artisans arranged it in an abstract composition, very similar to the non-conventional molecular forms. Both a glossy black and a gold-plated finish were used for the body, while glossy black and gold powder paint were the chosen finish of the shades. This stylish suspended ceiling light is the right fit for a contemporary living room, or even for a more modern master bedroom.
