Assembly Instructions

Step 1: TURN OFF POWER TO JUNCTION BOX TO BE USED FOR INSTALLATION.

WARNING: Failure to use the LED driver to power your pendant will permanently damage your product making it unusable

Step 2: Mount LED driver into J-Box. Make 120 VAC connections from the power source to the driver using the Black and White wires. Mount the driver to the top of the universal plate provided in the mounting packet using the double sided tape pre-attached to the driver. Then affix the universal plate to the J-Box using the 1.5" L #8-32 screws provided in the mounting pack. The Black, Red, Grey, and Purple leads should not be connected at this point.

Step 3: Feed the braided fabric cord into the canopy until the desired amount of cord is left between the canopy and light body. Take into account that a minimum of 6" of cord will be required for connecting the wiring in the J-box.

Step 4: Use the measuring tape to be sure that all of your light body is hanging the proper distance from the canopy. Tighten the cord grip using a flat blade screw driver. The cord grip is on the face of the canopy.

Step 5: Make Wire Connections to the Driver. Braided fabric cord must be wired to the Driver, **Black to Black and White to Red.** Make wire connections from driver to source power.

NOTE: The **Grey** and **Purple** wires are used for optional 0-10V dimming. If not applicable, cap the wires.

Step 6: Mount the canopy to the ceiling using the provided **Mounting Instructions.** Tape Driver to top side of Universal so that the Driver will sit inside of the j-box.
