**SAVE THESE INSTRUCTIONS!**

# Install the Fixture

- 1** Temporarily install the mounting plate to the junction box.
- 2** Mark the anchor locations through the holes on the mounting plate, then remove the mounting plate.
- 3** Install the anchors to the marked points.
- 4** Secure the mounting plate to the junction box and screw the anchor screws into the anchors.
- 5** Determine the wanted height or look of the fixture with the provided stems and pivots, then assemble them by screwing them together.
- 6** Feed the fixture wires through the column, then screw the columns onto the fixture.
- 7** Feed the fixture wires through the stem assembly, then screw the stem assemblies onto the columns.
- 8** Feed the cords through the canopy, safety cable, washers, and hex nuts, then place them onto the pivots and secure them together with the hex nuts.
- 9** Pull the power line wires out of the junction box. Trim the cord leaving enough to make electrical connections.
- 10** Connect the fixture to a suitable ground in accordance with local electrical codes.
- 11** Connect the white fixture wire (square and/or rigid) to the neutral power line wire with a wire nut.
- 12** Connect the black fixture wire (round and/or smooth) to the hot power line wire with a wire nut.
- 13** Install the shade by placing it over the socket and screwing the collar nut onto the socket to secure in place. Repeat for remaining shades.
- 14** Screw the lamps into the sockets. Refer to the label on the socket for Max Wattage Information.
