Design Oriano Favaretto

MEDEA SP 2

The search for primordial forms and their combination leave ample scope for interpretation. The glass and the light range of colours create transitional half-tones suggesting their shape as in a watercolour of vibrant transparencies. The LED source illuminates the surface and the glass at the same time, bringing towards the ceiling a part of the soft-colour light. Mounted in clusters or individually, they show a strong stylistic character, and become almost sculptures. Crystal, smoke and old green glass colours are enriched by black matt steel finishes.
