

## allmedic™ 200 ml – Active Face & Body Cleanser

Features	Benefits
12% + Glycolic Acid Natural Chemical Exfoliator	<p>AHA's are water soluble.</p> <p>Targeting dead or damaged skin by breaking the bonds between the surface skin cells resulting in chemical exfoliation. This increases the shedding of dead old skin cells allowing newer and healthier keratinocytes /skin cells to surface.</p> <p>Younger cells at the surface make the skin appear healthier and more youthful.</p> <p>Helps rough, dry, scaly skin become smooth and hydrated in a short period of time.</p> <p>Studies have shown that AHAs and Salicylic acid may also help to stimulate collagen production for firmer skin.</p>
2% + Salicylic Acid Natural Chemical Exfoliator	<p>The BHA salicylic acid is a lipid (oil) soluble molecule. This allows it to penetrate pores that contain sebum (oil) and exfoliate the pore lining</p> <p>This makes it particularly useful to use on oily skin and acne prone skin to control breakouts.</p>
Improves the epidermal barrier function of the skin.	<p>Maintains skin hydration by reducing trans-epidermal water loss.</p> <p>Ongoing use helps enhance the appearance of the skin and may help to smooth skin texture, improve uneven skin tone and diminish the appearance of fine wrinkles.</p>
Non-Soap, gentle foaming lotion.	<p>Suitable for all skin types.</p> <p>Nondrying</p>
