

Caravan and Motorhomes catalogueEdition 1

About us

COH Baines was established in 1939, in Liverpool, England by Charles Oswald Henry Baines and his wife, Emily. A family run business, Baines started life as a supplier of motor vehicle spare parts that contained rubber elements.

By the 1960s, Baines was supplying patented rubber weatherstrips to a multitude of industries including, coach and ship building, engineering, aerospace and the sciences. Significant growth ensued. To support these endeavours, a second site in Kent was opened to help service demand for products on a national basis, firstly in Tonbridge and then later, in Tunbridge Wells, where our Sales Office remains to this day.

Today

2020 saw the business establish a UK central warehousing hub back in Liverpool. With great road, rail and airport networks on our doorstep, we are supporting the Supply Chain of our domestic and international customers with a world-class service offering.

Maintaining our family values with a collective knowledge in excess of 70 years, the COH Baines Sales team are industry and application experts who have built long term relationships with our customers, providing product and service solutions to meet the demands of today in some of the most diverse industries. These include Aerospace, Automotive, Construction, Electronics, Engineering and Leisure Industries including, Caravans, Classic Cars and Marine.

We have been ISO certified for over 20 years and our commitment to Quality is demonstrated not only by the integrity of our products, but in how we operate our business; customer satisfaction is at the heart of everything we do.

Our core competencies are rubber, sponge and plastic extrusions, mouldings, matting and tubing.

With an extensive stock holding across more than 1,000 part numbers, alongside a comprehensive range of made to order parts; our products can be purchased 24/7 via our website www.coh-baines.co.uk

We can provide sample profiles prior to purchase to give you confidence you are sourcing exactly what you need. If you can't find exactly what you are looking for, our expert manufacturing team will be able to custom make a solution to your exact specification.

Rail trim tool for fitting CRS13, CRS 22 and CRS 28

To use this tool, hold with the point and loop downwards.

The trim is put inside the hoop facing down.

Place over the aluminium profile, with the lip of the trim on the inside (see sketch blow). Hold the end of the section and push the tool away towards the excess trim to feed it onto the rail.

The tool will not work on all rails, only with the lip rails as shown below.
