

Amherst fountain

A classic. This stately fountain provides a very distinct pattern separated into three tiers capped by an impressive center water height of over 35 feet.

The **Amherst** is stunning in both sight and sound, and the large flow rate creates a pleasing ripple effect across the water's surface. The classic, stately pattern of The Amherst Fountain provides a very distinct separation of all three tiers, capped by an impressive column reaching heights of over 35 feet.

Worry-free winterizing

The Scott Aerator Company has engineered all of its water features to eliminate the need for costly, time-consuming winterizing products and procedures. Simply leave your fountain in the water, turn off its power supply, and forget about it all winter. Once the water thaws in the spring, re-establish power to the unit and you're good to go. All components will withstand sub-zero conditions without damage.

The Scott Aerator Awesome Warranty

All Scott Aerator motors are unconditionally warranted for **five years** against motor defects in materials or workmanship, under normal operating conditions. All other product components are warranted for one year from date of purchase. Scott Aerator will repair or replace failed parts under warranty when the defective unit is returned to the factory, shipping prepaid, and factory inspection establishes that the part was defective. The unit must be returned to the factory prior to shipment of replacement parts. All parts replaced under this warranty will be returned with shipping prepaid. Scott Aerator will not be liable for consequential damage nor for any costs associated with removal or attempts to repair components in the field.
