Surface Mount Box

Surface mount boxes come very handy and easy to install when you want to have one or two connections on walls or on the flat surfaces without much clutter and congestion. STL surface mount boxes are best suited for such requirements. Robust and easy to install units come in both single part and two port version. These SMBs are supplied with mounting screws for quick and easy installation. Made out of high-quality ABS material STL surface mount boxes are the right choice for establishing connectivity for voice and data as needed.
