

## Directions:

NOTE: For best results, surfaces should be clean and dry and items should fit together well.

1. Protect clothing and work surfaces (metal foil works well). Use in a well-ventilated area. Carefully follow tube-opening directions on package. Unscrew cap while keeping tube pointed away from face.
2. Apply to one surface, using 1 drop per square inch of surface. Assemble parts and hold together with pressure for 15 seconds or until set.
3. Wipe top of nozzle if adhesive has accumulated before recapping tube securely after use.
