

OFF-ROAD

JKGT

G'DAY LEGEND !

At JKSM OFFROAD, we're not just passionate about all things automotive, we're downright obsessed! From cars to trucks and bikes, we live and breathe everything that's got wheels and an engine. But, let us tell you, there's nothing quite like the rush of hitting the trails and exploring the great outdoors.

We know how important it is to have gear you can rely on when you're off the beaten path. That's why we're dedicated to providing the off-road community with top-quality products that not only perform great but also look amazing on your rig.

Ready to join us on this incredible off-road adventure?
Let's hit the road and get muddy!

THANK YOU

Everyones experience is different, and we are all about improving and growing. Leave a review or get in contact with us and let us know how we can do just that.

BONNET LIGHTBAR MOUNT

JEEP WRANGLER JL - JT
LIGHTBAR 18.6" OR 24.5"

The JKSM Bonnet Lightbar Mount is as the name suggest; a lightbar mount that mounts to the bonnet hinges on your Jeep JL or JT. Suitable for any 18.6" or 24.5" lightbar.

JKSM

01 INSTALL

Allow a professional to assemble and install this product correctly. Damage to the body could occur if not installed properly.

02 PROTECT

If you are worried about scratching the paint on the car during install, put some automotive tape down.

03 CHECK

Before every adventure, double check everything is secure and all bolts are tightened.

ASSEMBLY

Ensure you have all the parts listed on the next page before proceeding, your lightbar comes with bolts and washers.

Note: Lightbar shown is a STEDI™ ST3301 Pro 24.5 Inch

PARTS LIST

Parts in the box.

x1 Left Lightbar Mount

x1 Right Lightbar Mount

x4 M8 x 20mm Bolts

x2 Hinge Pads

x4 M8 Washer

Parts not supplied.

Lightbar 18.6" or 24.5"

x2 Bolts

x2 Spring Washer

x2 Washer

Note: Parts shown are from a STEDI™ ST3301 Pro 24.5 Inch

01 INSTALLATION

Remove the bonnet hinge bolts on the car using the Jeep torx kit or a T40 torx Allen Key. Replace the bolts with the Hinge Pads making sure that the recessed edge points to the outside of the car.

JKSP

PARTS REQUIRED

x2 Hinge Pads

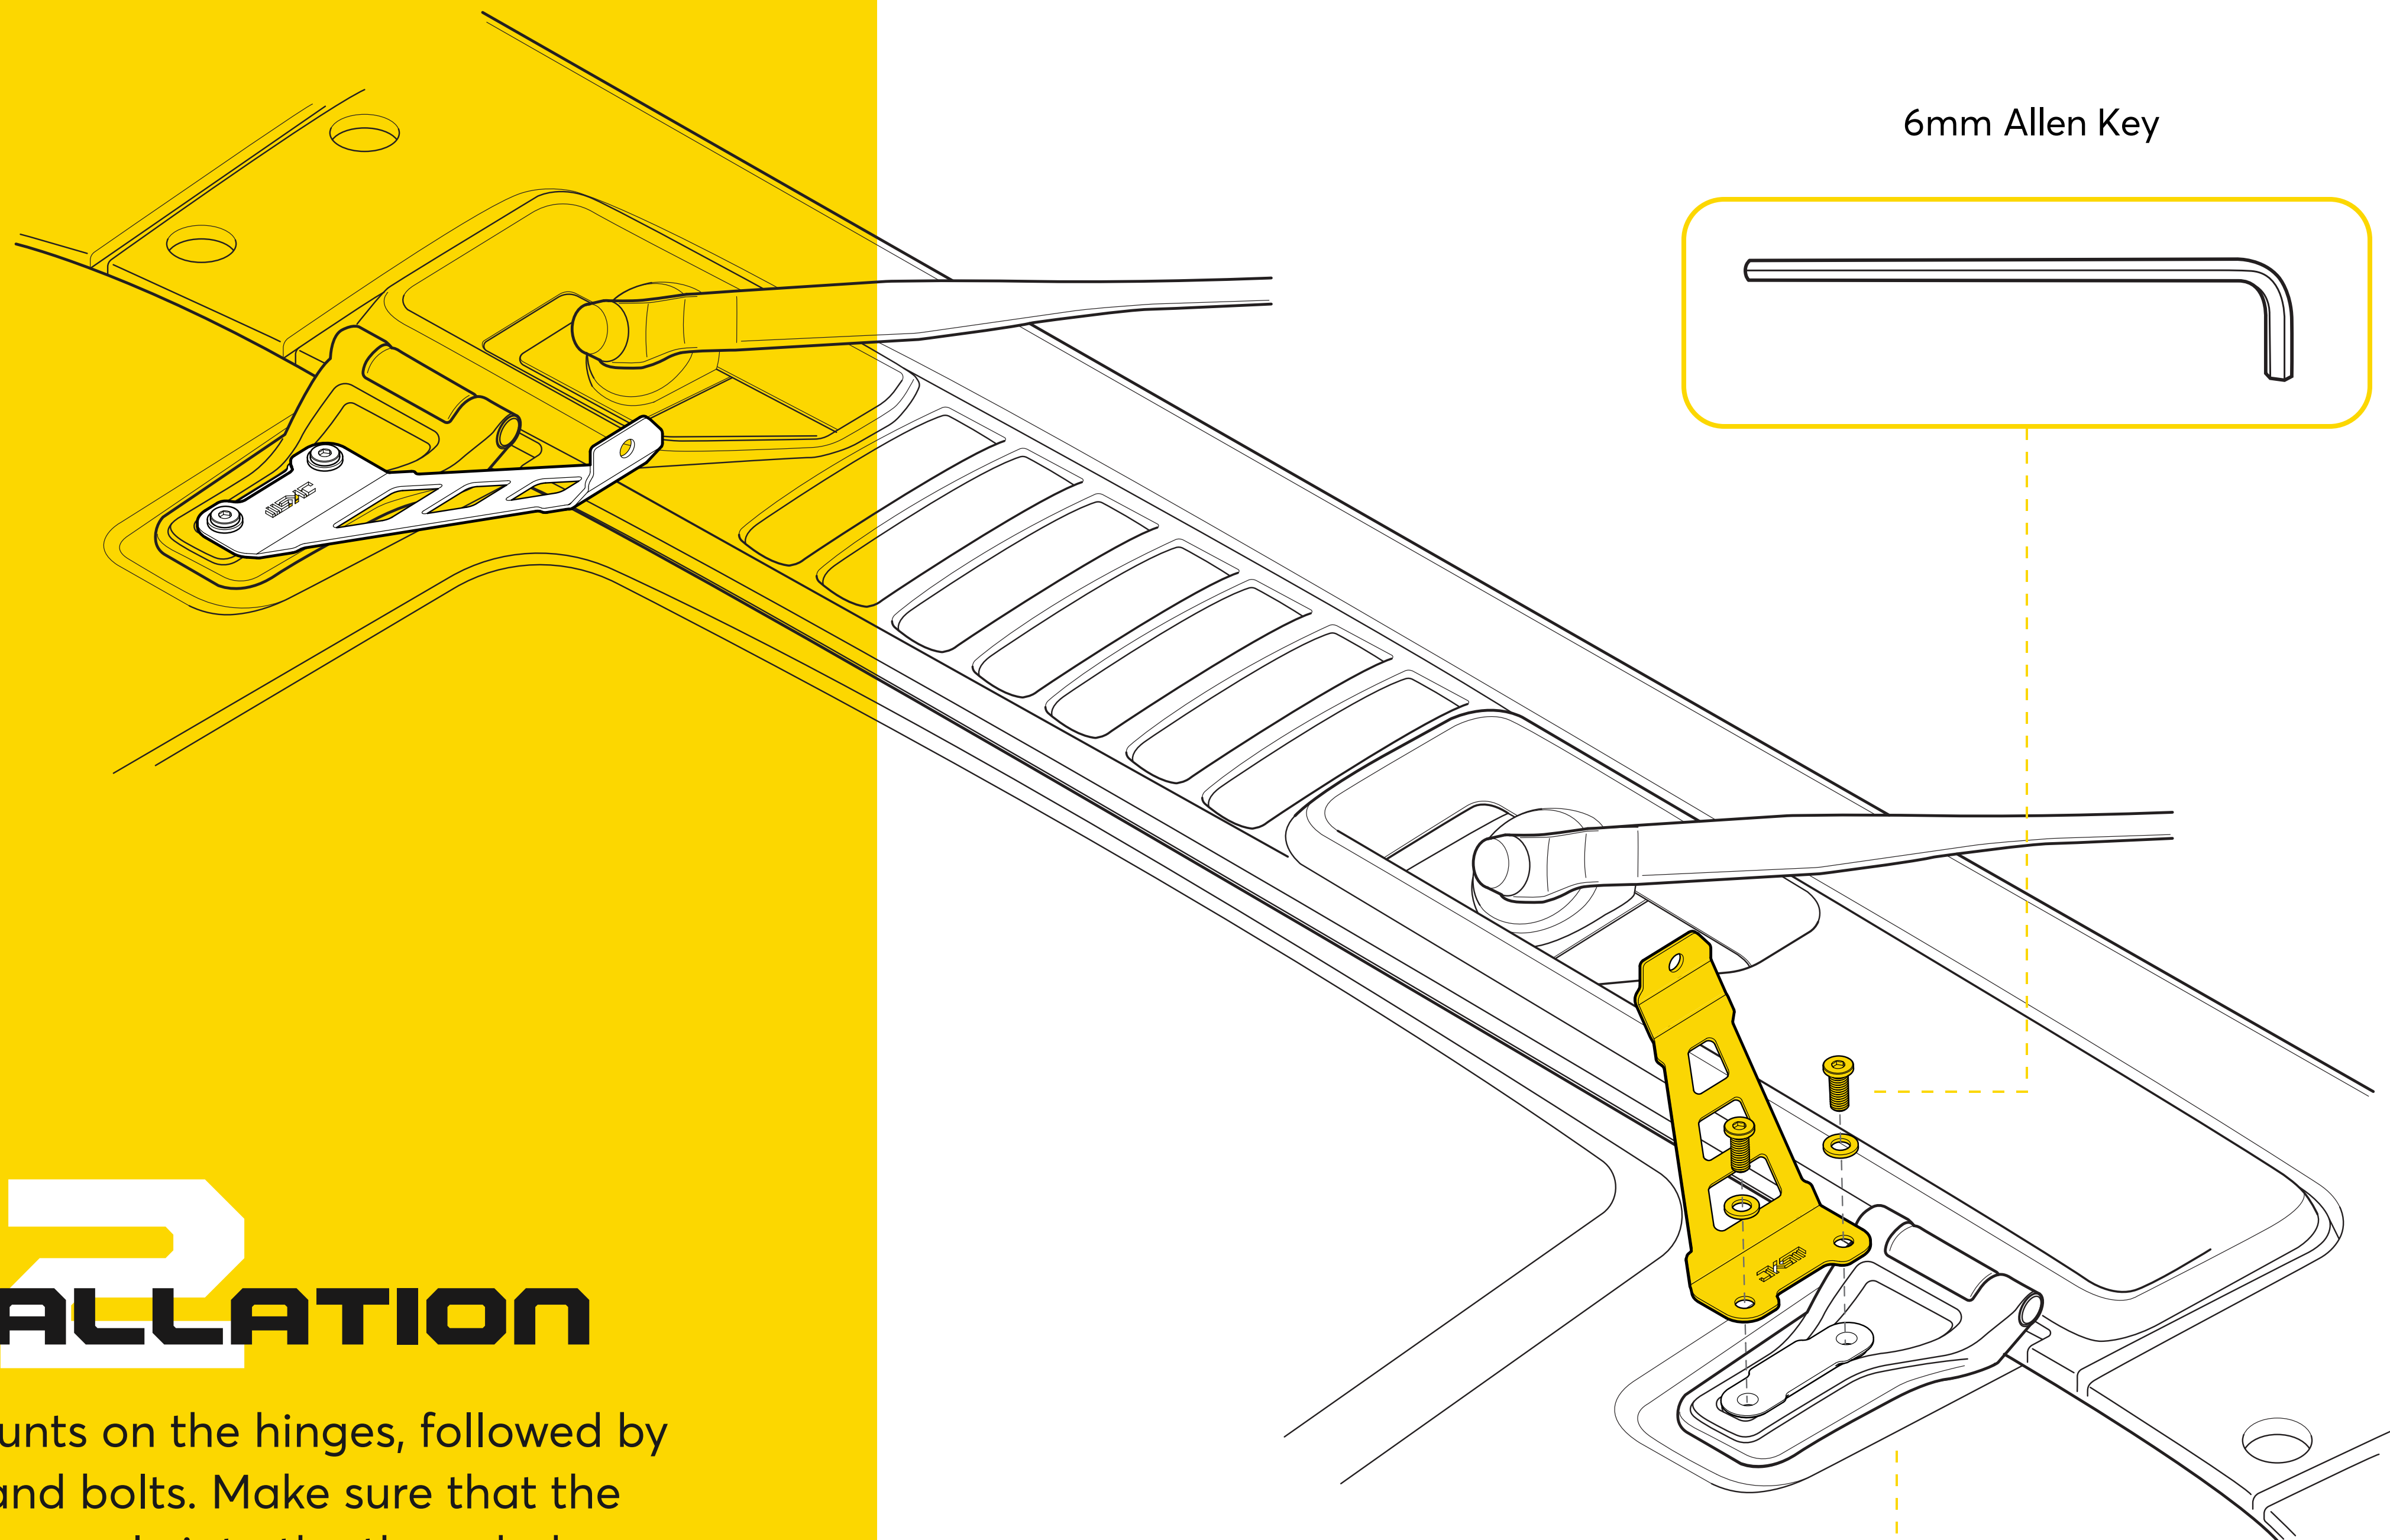

T40 Torx Allen Key

02 INSTALLATION

Place the Mounts on the hinges, followed by the washers and bolts. Make sure that the bolts thread properly into the threaded plate that sits underneath the bonnet. The plate can move so it may require some effort. Ensure the mount is tightened securely.

JKSTP

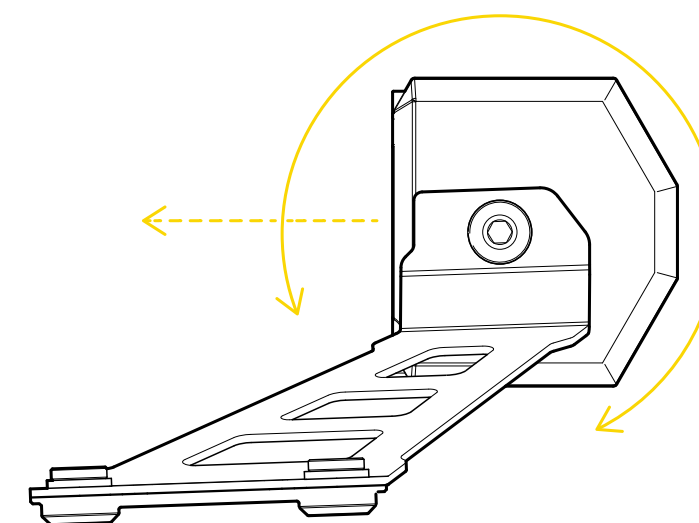

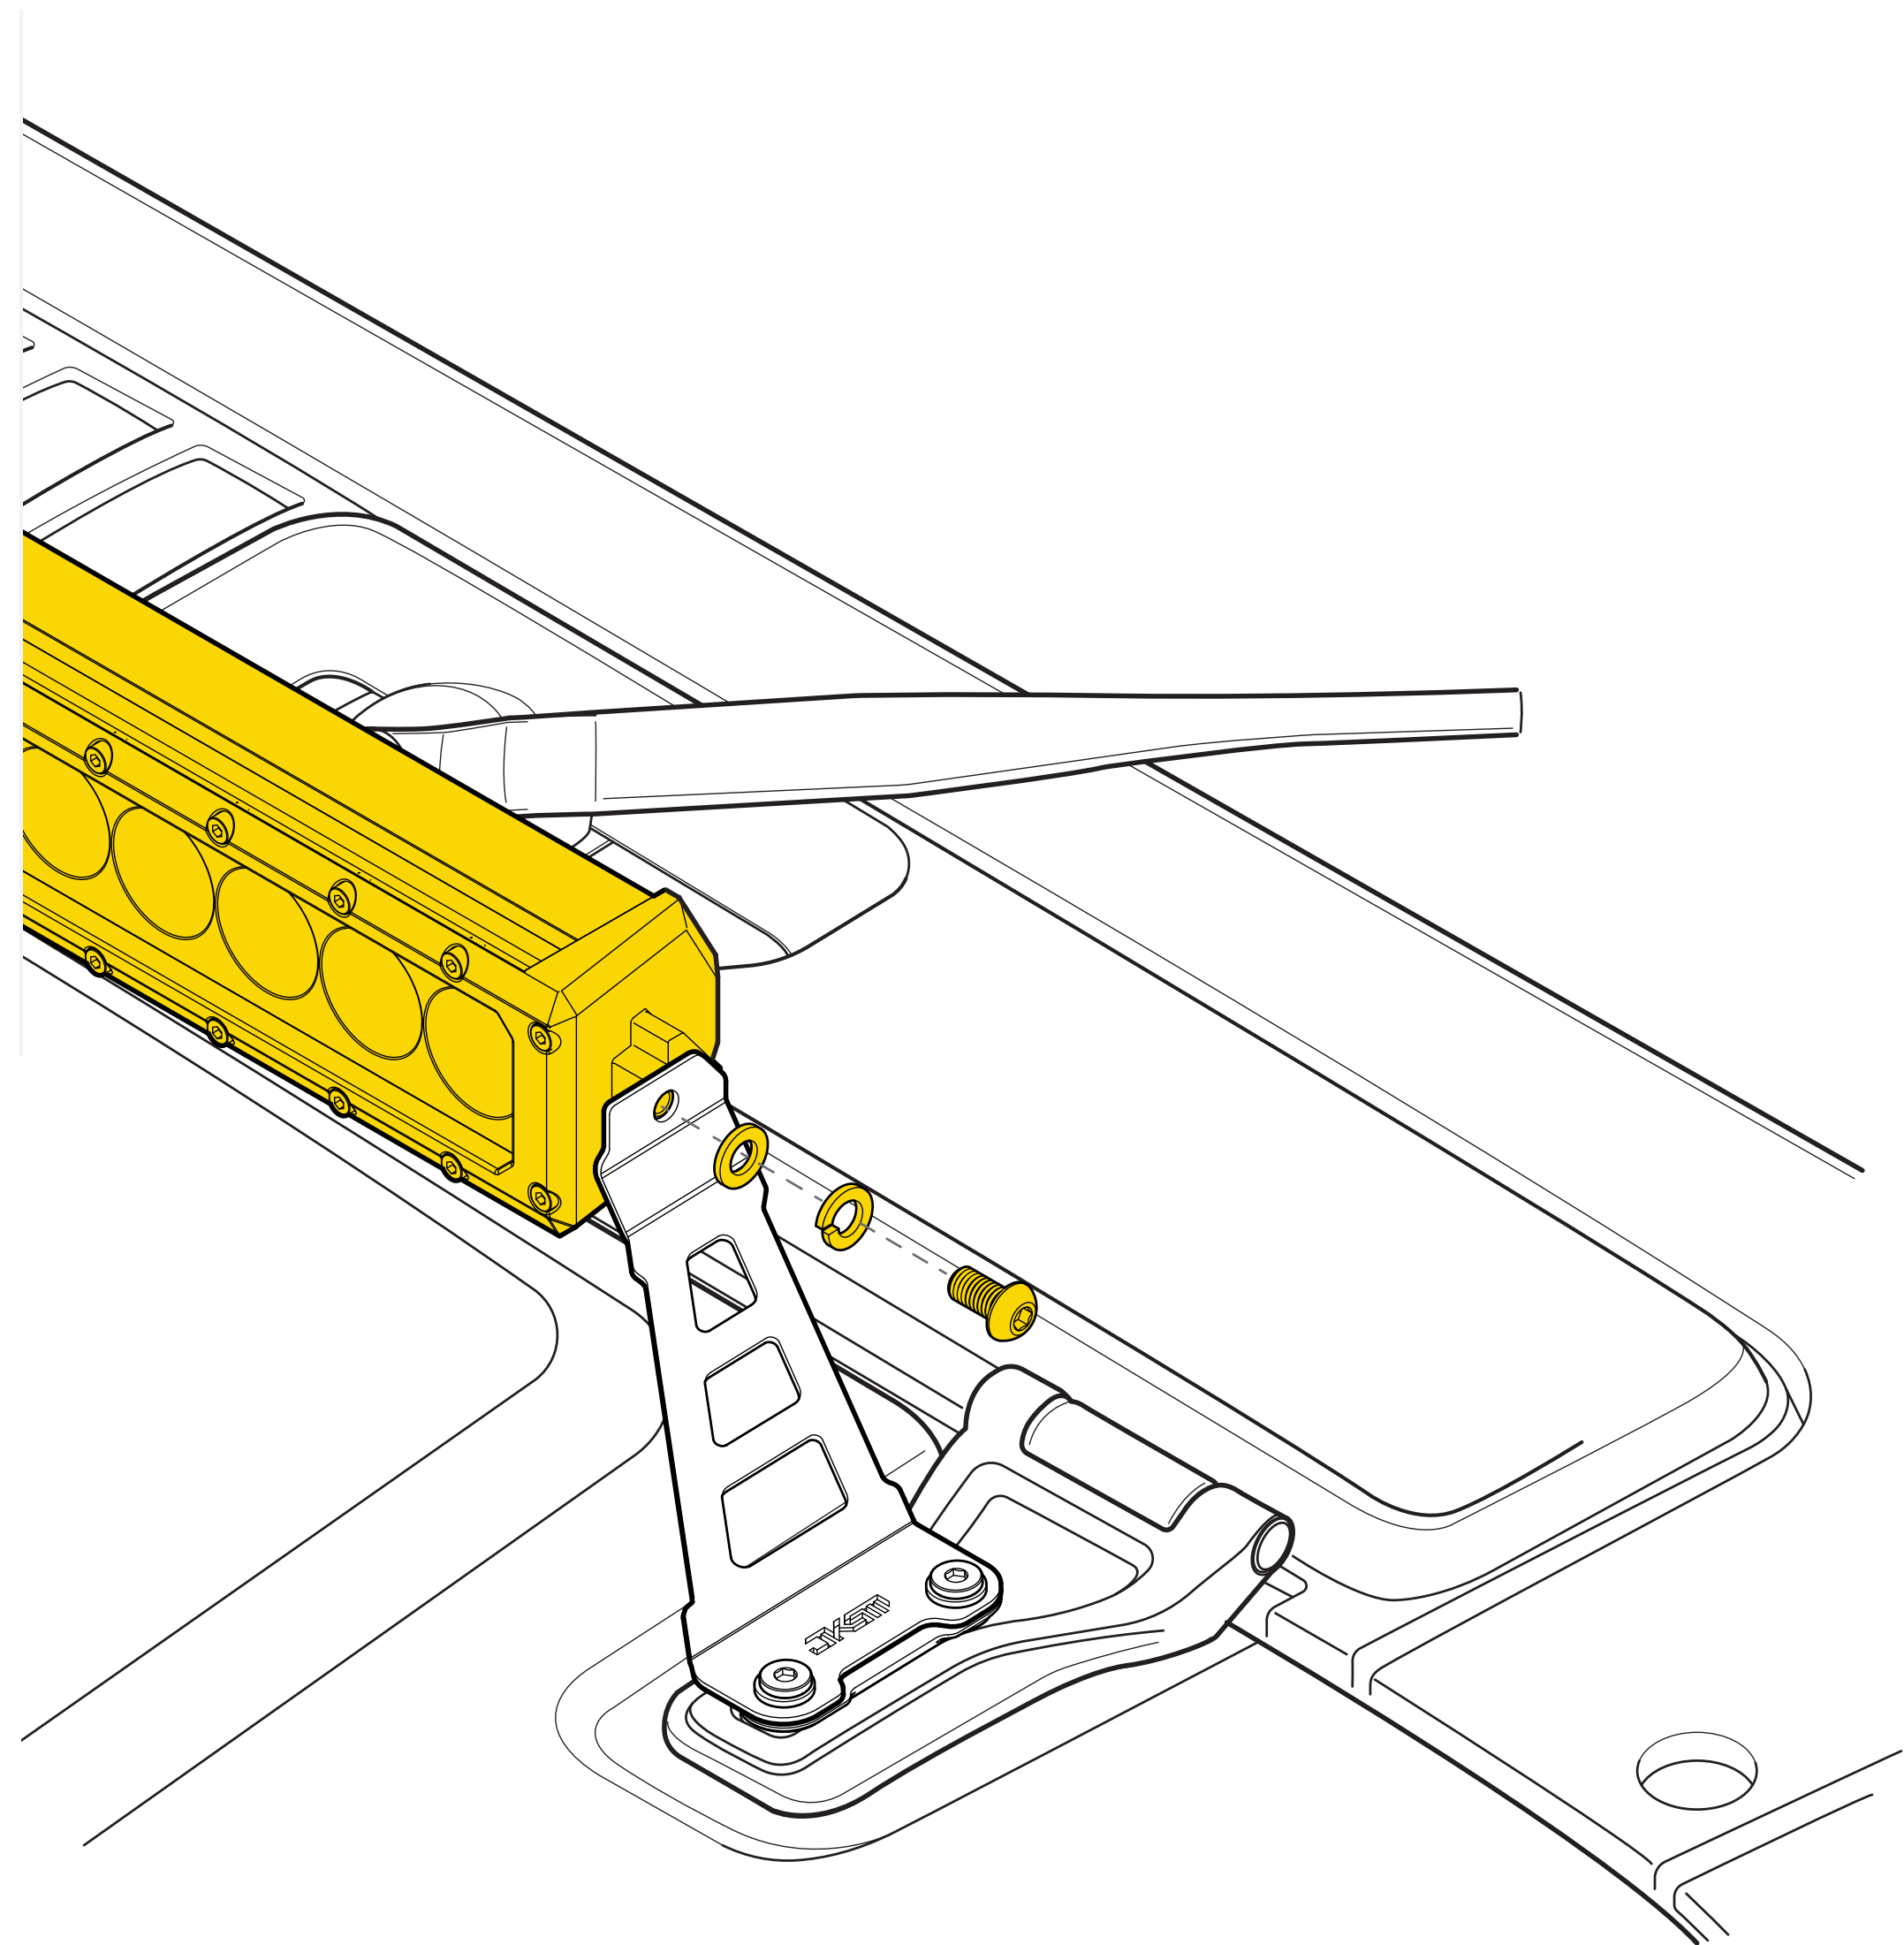

6mm Allen Key

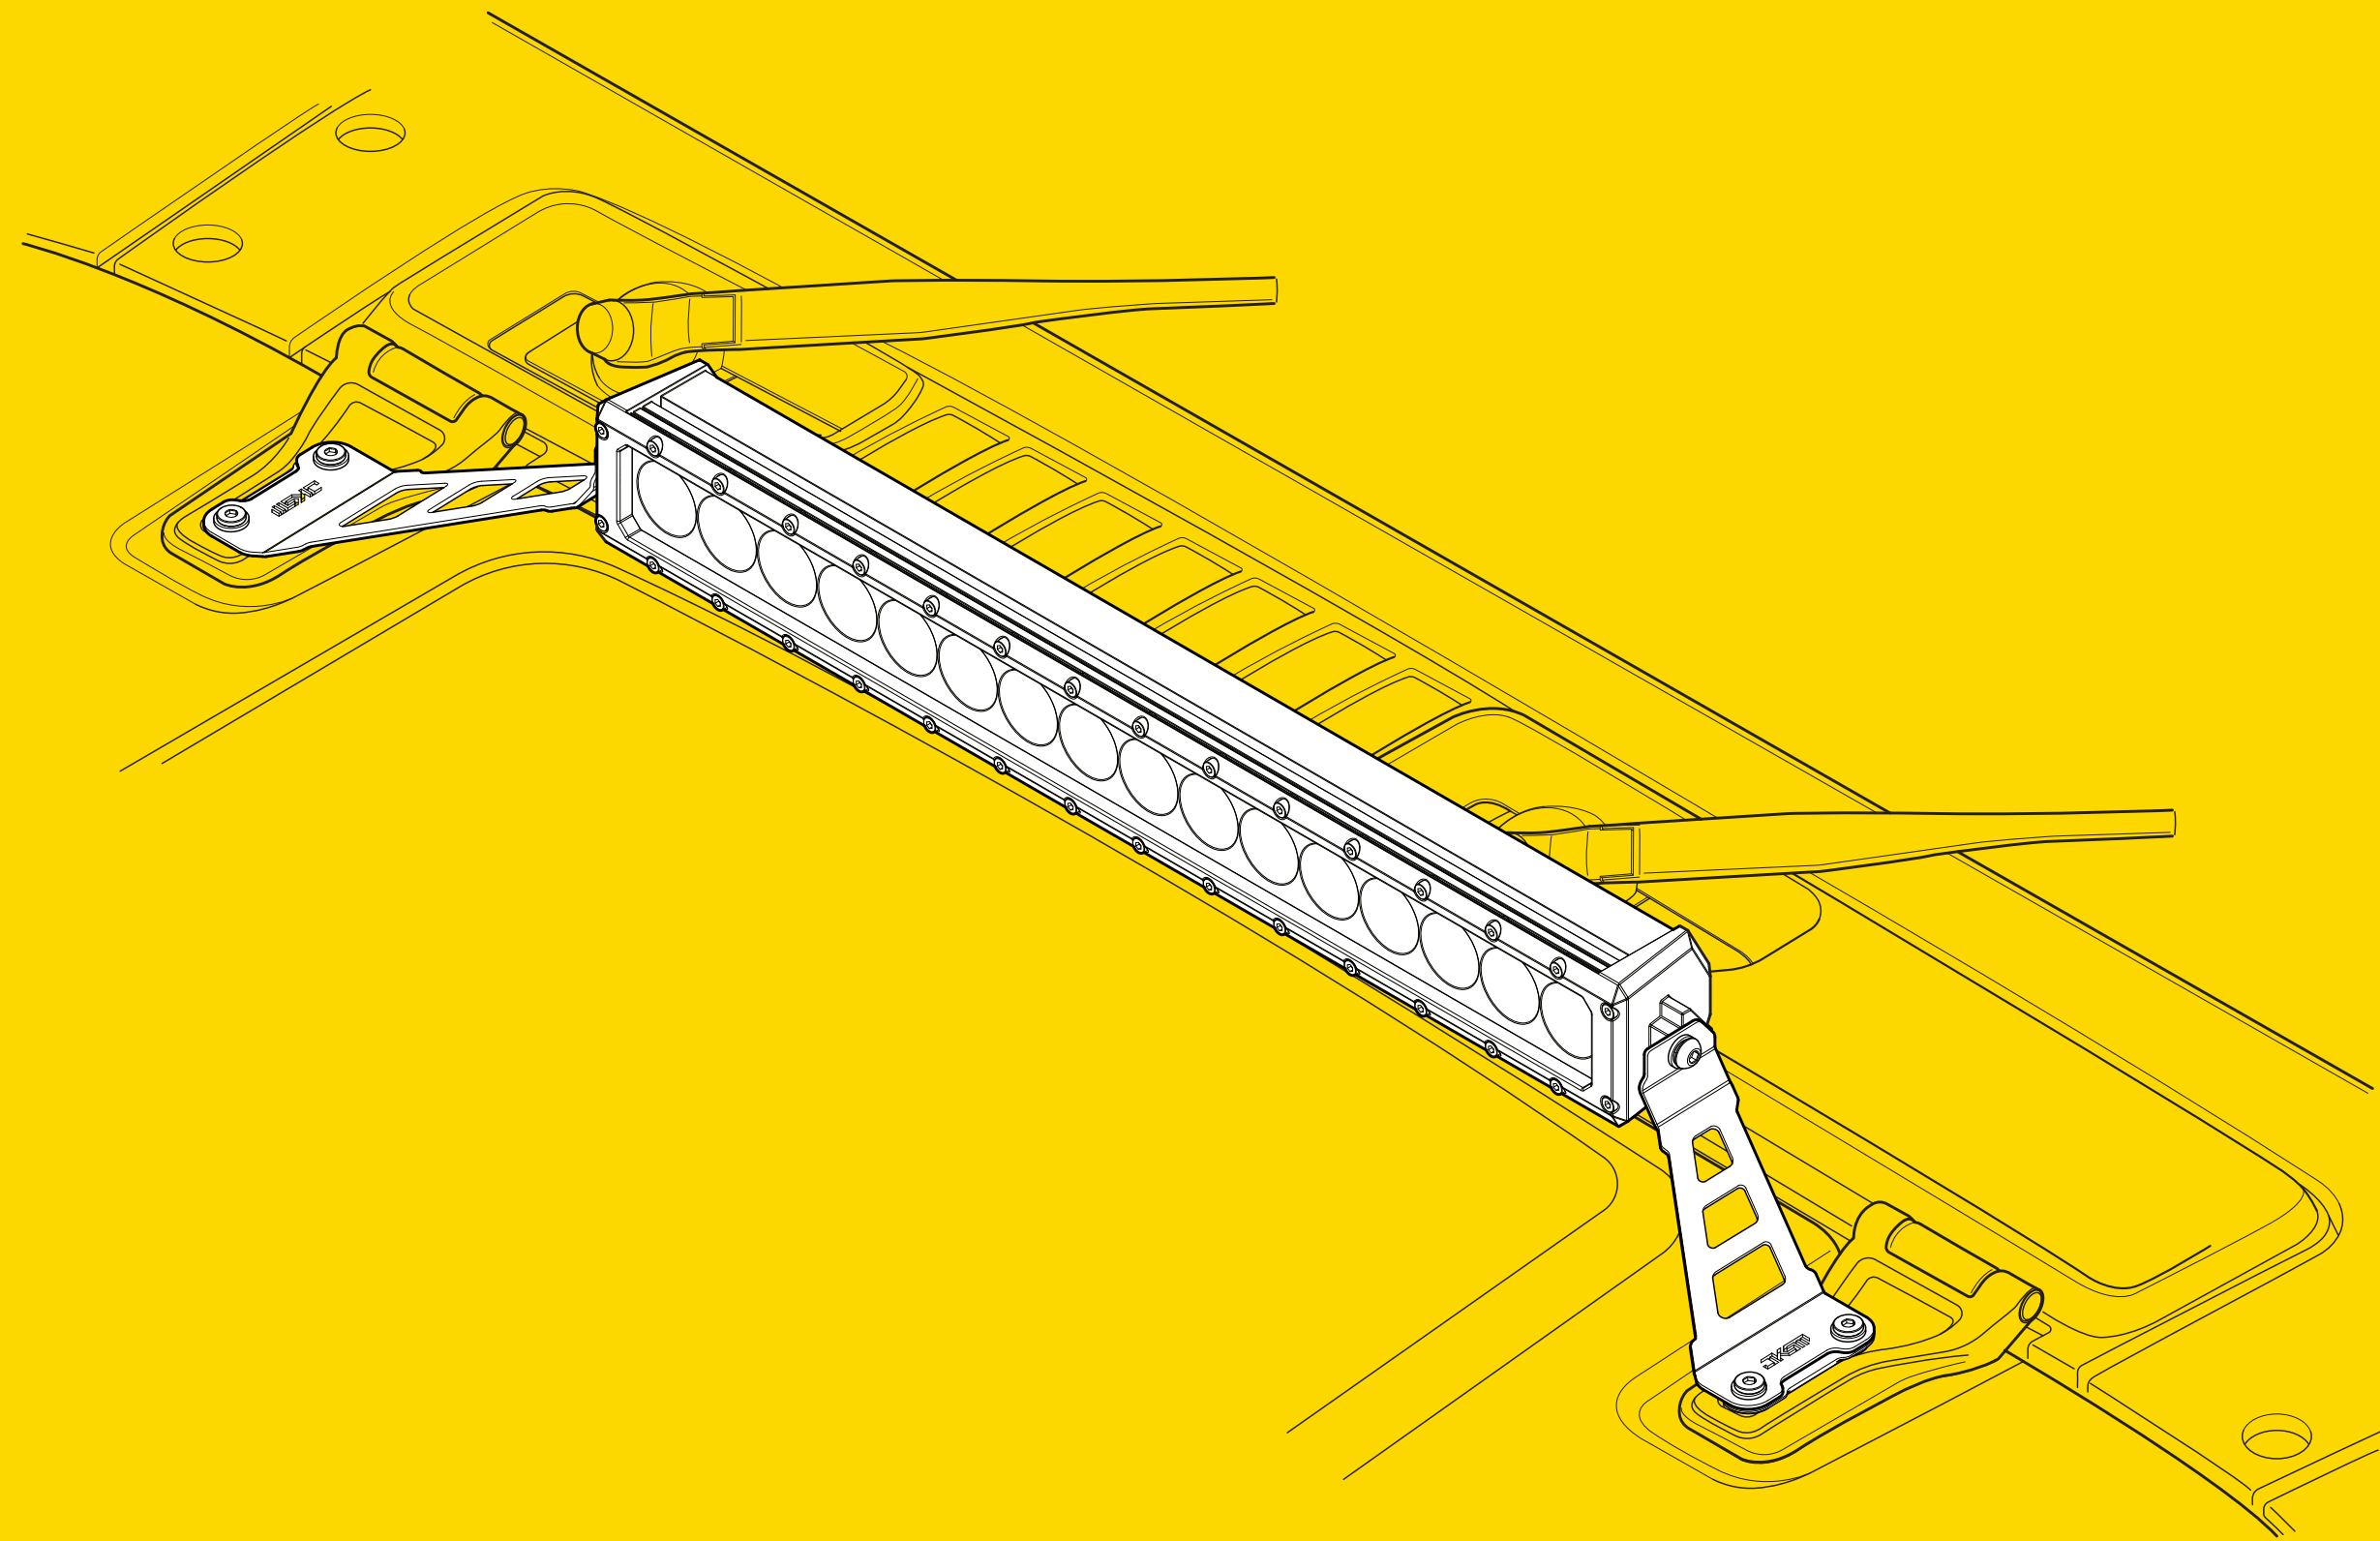

Threaded Plate

02 INSTALLATION

Using the fasteners supplied with the lightbar of your choice, bolt the lightbar to the mounts starting with the washer, followed by the spring washer and bolt. Adjust the angle of the lightbar until it points forward.

JKSTP

OH COMPLETE

Give it a few firm test shakes to make sure it's on properly and be on your way!
