Leather EDC NexBelt®

Everyday Carry Belt

Designed for the everyday firearm carry, but can be used for any purpose that requires attaching tools to the belt. Especially useful for IWB style carry, as the belt can be tightened and loosened in very small increments and on the fly, particularly convenient when putting the holster on, or taking it off, and avoiding the belt being respectively too tight or too loose. The backing of the leather belts are manufactured with high-density nylon of an advanced composite of ultra-fine polyester for extra stiffness and durability.

In addition, our belts have a water-repellent liner to stop sweat from seeping and staining the surface of the belt. Now you can conceal in comfort, style, and convenience.

FEATURES:

- One handed, on the fly, belt adjustments, especially useful when putting on, or removing an IWB holster
- 1/4" incremental belt adjustments instead of standard 1" adjustments
- Heavy-duty engineered leather, available in tan or black, durable for everyday carry of firearms
- Water repellant liner
- One size fits majority of people, up to 50" waist, simply cut off excess and install buckle
