

SIZING GUIDE

We believe the right shoes are the foundation of what you can achieve in this sport. And the right shoes start with the right fit.

Here are our tips to help you find your fit so your cheer shoes can work as hard as you do.

TOE

You should be able to wiggle your toes. Allow .25" to .5" (thumbnail's length) of space between end of longest and the end of the shoe.

HEEL

Heel cup should fit snugly around the heel, without much slipping for optimal stability and support.

WIDTH

Foot should fit comfortably without stretching the upper over the midsole of the shoe. Flyers may prefer a tighter fit for an extra-secure feeling in the air.

LENGTH

Shoe lengths vary by style. See size chart for comparison.

DIRECTIONS

1. Download and print Sizing Guide.
2. Check print scale using a standard size credit card in the box below.
3. Align the heel of your foot with the curved line.
4. Measure both feet wearing socks only, no shoes.
5. Select size based on measurement of longest foot, rounded up to the nearest $\frac{1}{8}$ "- $\frac{1}{4}$ ", using the No Limit Size Chart.
