The Selkirk® Model EFC Expandable Flexible Gas Vent Connector is designed for use with gas-fired appliances equipped with draft hoods and other appliances listed for use with Type B Gas Vent.

This Model EFC Expandable Flexible Gas Vent Connector system eliminates the need for elbows and greatly simplifies most gas appliance vent installations.

The Model EFC is available in 3" & 4" diameters and can expand from one foot to three feet or from two feet to five feet. Ask your sales associate for details.

Center section allows for 360° flexibility & is expandable from 1 to 3 feet or 2' to 5'
