ELECTRIC

Better outdoor heating for less

The unbeatable outdoor heating solution

The Cobalt Electric Heater product family is a durable and reliable entry level outdoor heating solution. Cobalt Heaters distribute even comfortable heat with effective industry leading technology providing unrivaled coverage of up to 160 sq. ft.

FEATURES

Available in 2 models; 4000W & 6000W

The 4000W Electric series produces 4kW of heat to cover 130ft² whilst the 6000W Electric series produces 6kW of heat to cover 160ft².

Ultra-Durable Quartz Elements

Along with the corrosion-resistant SAE 304 stainless steel construction, the Cobalt Electric range available in 208v, 220/240v and 227v.

Parabolic Reflector

The anodized rear reflector directs lost infrared energy back towards the desired direction, maximizing performance and efficiency.

Easy Heating Control

Our remotes provide maximum control with on/off as well as dimming capability to ensure ease of use and perfect heating to suit the conditions.

Recess Options Available

The heater requires minimal vertical clearance as well as being able to be recessed with an Intertek certified kit.
