

Contemporary Series

Full Pan Vented Systems

Full Pan Systems provide a stylish way to add flare to your fireplace. The low profile tray formed burner gives the elegant effect that the fire is rising out of the fireplace floor. Multiple media options are available including Fire Glass and River Stones.

Driftwood Logs 24" Set

Driftwood Logs on the Full Pan Burner System deliver a contemporary look with the smooth lines of each log in the stack.

- Logs available in 18" to 28" sizes (28" logs go on 30" Full Pan Burner Kit)
- Low profile, stylish look
- Can be used in Single Side and See Thru applications

Colonial Cannon Balls 24" Set

Colonial Cannon Balls on the Full Pan Burner System create a unique symmetrical stack where the flame comes up through the middle of the set.

- Cannon Ball sets available in 18" to 30" sizes
- Modern style and flare
- Can be used in Single Side and See Thru applications

Blazing River Stones 24" Set

Blazing River Stones on the Full Pan Burner System offer a rustic, low profile stack allowing for a distinctive flame pattern.

- River Stones sets available in kits of 7 stones (4kits for 18" FP, 6 kits for 24" FP, 8 kits for 30" FP)
- Contemporary look and feel
- Can be used in Single Side and See-Thru applications

Fire Glass 24" Set

Fire Glass on the Full Pan Burner System provides a reflective sparkle as the flame dances across the glass.

- Fire Glass available in 10 lb. bags to accommodate the various Full Pan sizes
- Sparkling elegance
- Can be used in Single Side and See-Thru applications

Full Pan Burner

IMPORTANT:

For the best results fill the Full Pan Tray 2/3 of the way with the Burner Pan Sand (Natural Gas) or Vermiculite (Liquid Propane Gas) then the rest of the way with Fire Glass or Fire Beads. It should take a maximum of 10 lbs. of glass to fill the remaining portion of the burner tray. More Fire Glass will be needed if you are covering the fireplace floor.

Reflective Fire Glass

*Available in 1/4" and 1/2" in various colors
